INTRODUCTION

Laptop screens can crack or stop displaying picture. This guide will show users how to replace the screen.

⚒ TOOLS:

- Spudger (1)
- Phillips #0 Screwdriver (1)
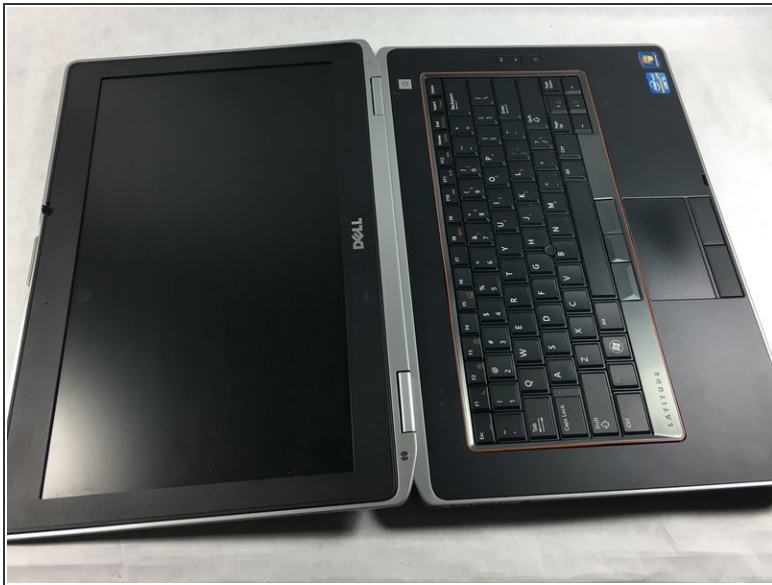

Step 1 — Battery

● Push the tabs on the left and right of the battery out towards the edge of the case.

Step 2

● While still pushing in the tabs, using your pinky finger, lift the battery out of the laptop.

Step 3 — Screen

- Open the laptop and lay it flat on your work surface.

- Using the spudger, lift the bezel up from around the laptop screen.

Step 4

- Using the screwdriver, remove four 5mm Phillips #0 screws from the bottom of the laptop screen.

- Using the screwdriver, remove two 3mm Phillips #0 screws from the top of the laptop screen.
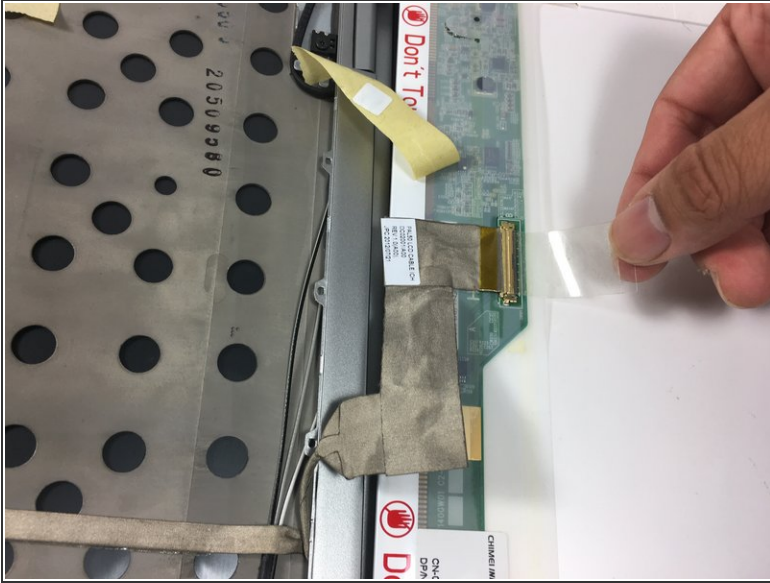

- Lift the screen.

Step 5

- Lift the laptop screen and flip it over to lay it on top of the keyboard.

Step 6

- Remove the piece of tape from the back of the LCD cable.

Step 7

- Lift the piece of tape attached to the LCD cable.

- Once the tape has lifted, gently pull back to unplug the LCD cable.

To reassemble your device, follow these instructions in reverse order.
