

Google Home Mini Disassembly

A guide to disassemble Google Home Mini for...

Written By: Mia Sulaiman

INTRODUCTION

A guide to disassemble Google Home Mini for further repairs.

TOOLS:

[Tweezers](#) (1)

[T6 Torx Screwdriver](#) (1)

Step 1 — Google Home Mini Disassembly

- Place device on a flat surface.

Step 2

- Remove the rubber bottom as per the [Google Home Mini teardown guide](#).
- Remove the four 7mm T6 Torx screws from the bottom.

Step 3

- Remove the lower half of the device.
- ⚠ Be careful as a black ribbon cable connects the two halves together.

Step 4

- Using a pair of [tweezers](#), unlatch the Zero Insertion Force (ZIF) fastener that connects the ribbon cable to the board.
- ① Flip up and push the ZIF fastener towards outside of the lower case to loosen it.

Step 5

- Pull the ribbon cable off.

To reassemble your device, follow these instructions in reverse order.
