

Protocol Neo-Drone AP Controller Switch Replacement

If a push button switch becomes broken on your Neo-Drone AP controller use this guide to fix it.

Written By: Andrew

INTRODUCTION

This guide will show how to replace one of the controller buttons should they become inoperative. Soldering is a skill needed to complete this action. The button being replaced is 6mm x 6mm x 9mm.

TOOLS:

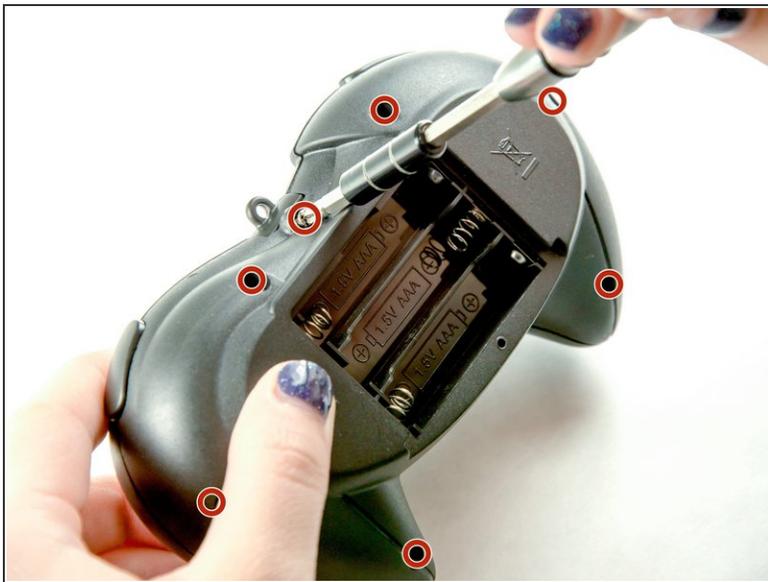

- [Phillips #1 Screwdriver](#) (1)
 - [Soldering Workstation](#) (1)
-

Step 1 — Controller Switch

- Remove the single 6.5mm Phillips #1 screw from the battery cover.
- Remove the three AAA batteries.

Step 2

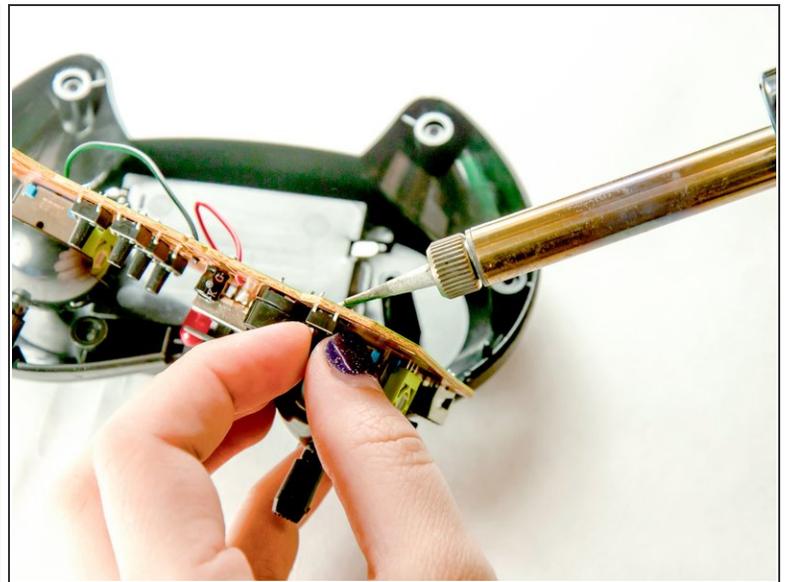

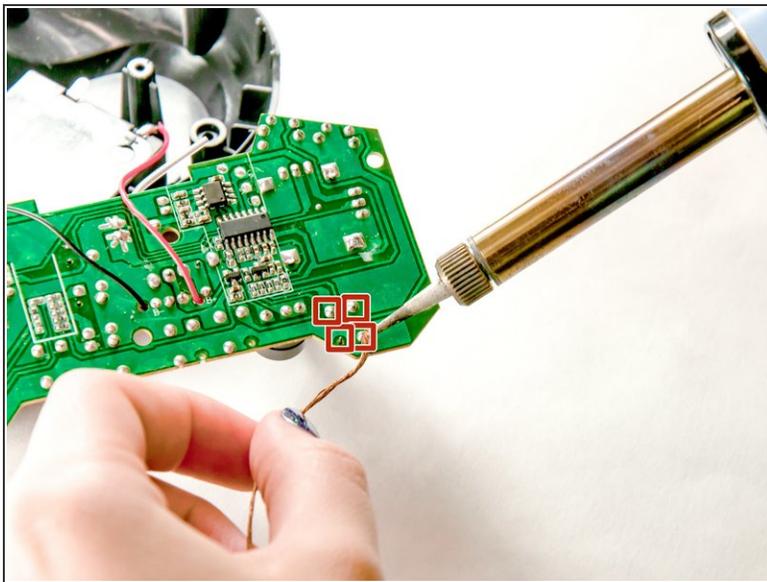

- Remove seven 6.5mm Phillips #1 screws from the back panel.
- Pull the back panel up to separate it from the front panel.

Step 3

- Remove three 4.5mm Phillips #1 screws from the motherboard.
- Pull the motherboard out of the case.

Step 4

 Here is a link to the [iFixit Soldering Guide](#)

- Use a soldering iron to remove the solder form the motherboard.

To reassemble your device, follow these instructions in reverse order.
