

Xiaomi Mi Power Bank 10400mAh Teardown

Simple fix for a dead, rattling battery pack.

Written By: Martin Hampton

INTRODUCTION

If you Xiaomi battery pack rattles then one of the battery strips may break off from the board. This is a simple fix to re attach.

TOOLS:

- [Essential Electronics Toolkit \(1\)](#)
-

Step 1 — Xiaomi Mi Power Bank 10400mAh Teardown

- This is the model

Step 2

- Remove it with a knife. Be really careful not to cut yourself
- The top is attached with double sided tape.

Step 3

- Remove 4 screws, and push the battery and circuit board out.
- You need to resolder the battery to the PCB.
- To keep the battery tight I used a piece of double sided foam tape on on of the edge cells
