

Dell Inspiron 15-7547 Speakers Replacement

Issues with sound can be fixed by replacing your speakers.

Written By: Claro

INTRODUCTION

The guide shows how to remove the speakers from the Dell Inspiron 15-7547.

TOOLS:

- [Spudger](#) (1)
 - [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Bottom Cover

- ❗ Before you begin, be sure to turn off your laptop and unplug it from the outlet.
- Close the display and flip the laptop on its back.
- Loosen the ten 5.0 mm-long Phillips #0 screws.
 - The four screws marked with orange will remain captive to the cover.

Step 2

- Use a spudger to pry up and loosen the back cover.
- Remove the back cover.

Step 3 — Speakers

- Orient the computer so that the hinge for the display facing away from you.
- Start removing the speaker on the left by pushing the speaker in the direction of the tick mark on the 2 outer pegs, then upwards
- ⓘ The tick marks on the two marked pegs should indicate the speaker needs to be pushed towards the center of the front of the chassis.

Step 4

- Remove the left speaker by pushing the speaker in the direction of the tick mark on the center peg, then upwards
- ⓘ The tick mark should indicate towards the middle of the back of the chassis.

Step 5

- Remove the wire connecting the left speaker to the right speaker.
- ⓘ The wire is secured by small notches, be careful not to break these.

Step 6

- Start removing the right speaker by pushing the speaker in the direction of the tick marks on the 2 pegs closest to the front of the device, and then upwards.
- ⓘ These tick marks should indicate towards the middle of the back of the chassis.
