

# iFixit Adhesive Remover Preparation

Instructions on how to prepare using the adhesive remover.

Written By: Arthur Shi

# INTRODUCTION

This guide shows how to safely use iFixit's adhesive remover.

---

## TOOLS:

- [Safety Glasses](#) (1)
  - [Nitrile Gloves 100 Box](#) (1)
  - [iFixit Adhesive Remover \(for Battery, Screen, and Glass Adhesive\)](#) (1)
-

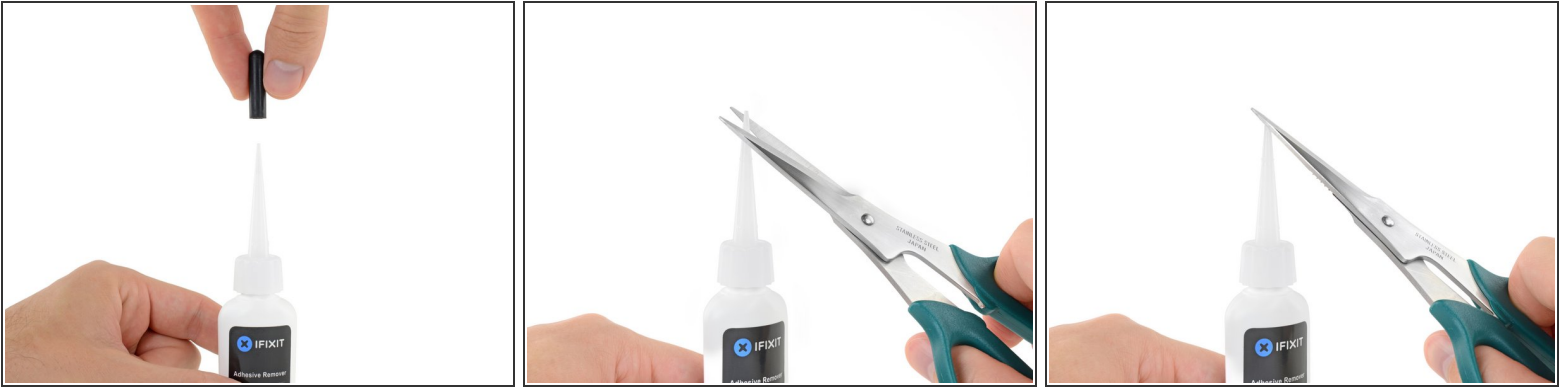

## Step 1 — iFixit Adhesive Remover Preparation

**⚠ iFixit adhesive remover contains acetone, a mild skin and eye irritant.**

- Wear eye protection when handling and applying the adhesive remover. (Eye protection is included in your kit.)
- **Do not** wear contact lenses without eye protection.
- Protective gloves are also included in your kit. If you are concerned about possible skin irritation, put your gloves on now.

## Step 2

- Pull off the black rubber stopper from your bottle of adhesive remover.

**⚠ Twist to loosen or remove the bottle cap before you cut the applicator tip.**

- ① This unseals the bottle and allows the pressure to equalize before you cut the applicator tip. **If you skip this step, the adhesive remover may spray out unexpectedly when the tip is cut.**

- Use scissors to cut off the sealed tip of the applicator.

- ① Cutting close to the narrow tip will give you better control so you can apply the adhesive remover in small amounts.

**⚠ Twist and close the bottle cap securely before you proceed further.**
