

Replacing the air filter in a Citroen C1

With this tutorial, you will be able to replace the air filter of your Citroen C1.

Written By: Subject42

INTRODUCTION

This tutorial allows you to replace the air filter of your Citroen C1 | 1.0 fuel.

Equally useful for the Peugeot 107 and the Toyota Aygo, the three vehicles communicate on the same platform and the same 1.0 fuel motor.

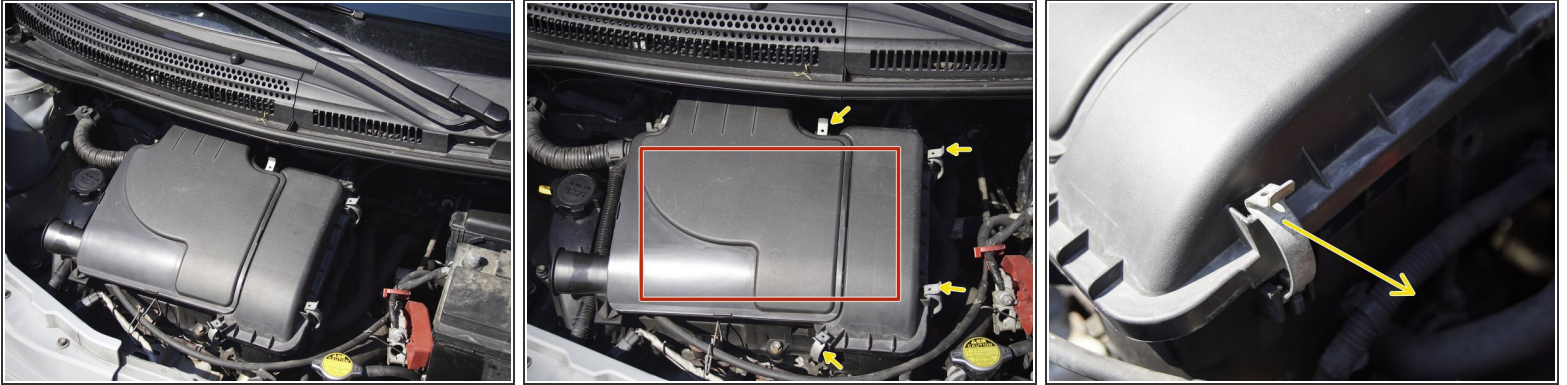

PARTS:

- [New Item](#) (1)

Step 1 — Air Filter

- Open the hood of your C1 by finding the lever located under the steering wheel to the left and pulling it.
- Identify the air filter box.
- Remove the hooks to detach the air filter box.

Step 2

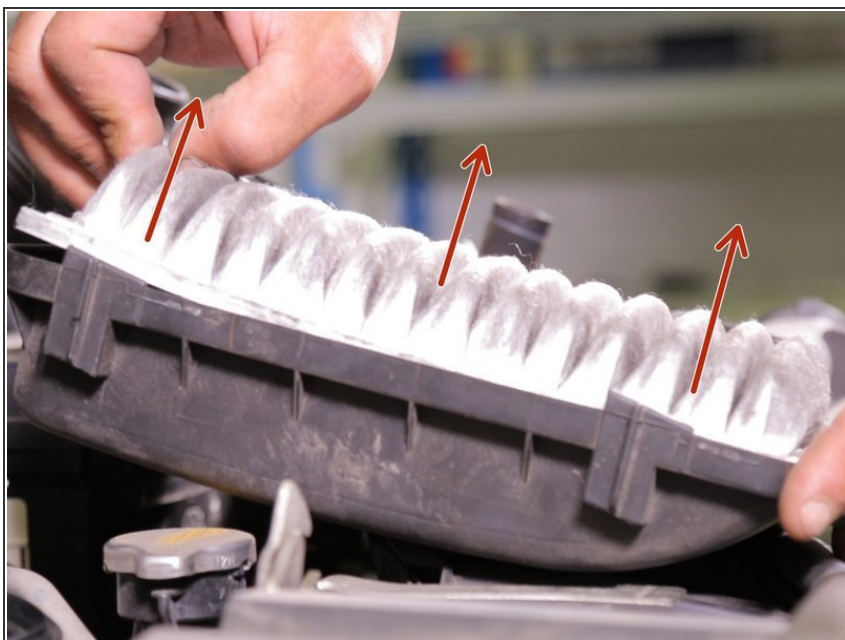

- Loosen the collar and reassemble it to free the sleeve.
- Loosen the collar of the air intake pipe.

Step 3

- You can now remove the air filter box.

Step 4

- Remove the air filter from its housing.
- You can now install the new air filter.

To reassemble the air filter box, follow the instructions in reverse order.
