INTRODUCTION

Prereq for display assembly.

TOOLS:

- [Spudger](#) (1)
-

Step 1 — iSight Camera Cable

- Use the tip of a spudger to push the iSight camera cable connector straight away from its socket on the logic board.
- i** It is recommended to carefully push on both sides of the connector to "walk" it out of its socket.

Step 2

- Move the iSight camera cable aside.

To reassemble your device, follow these instructions in reverse order.
