INTRODUCTION

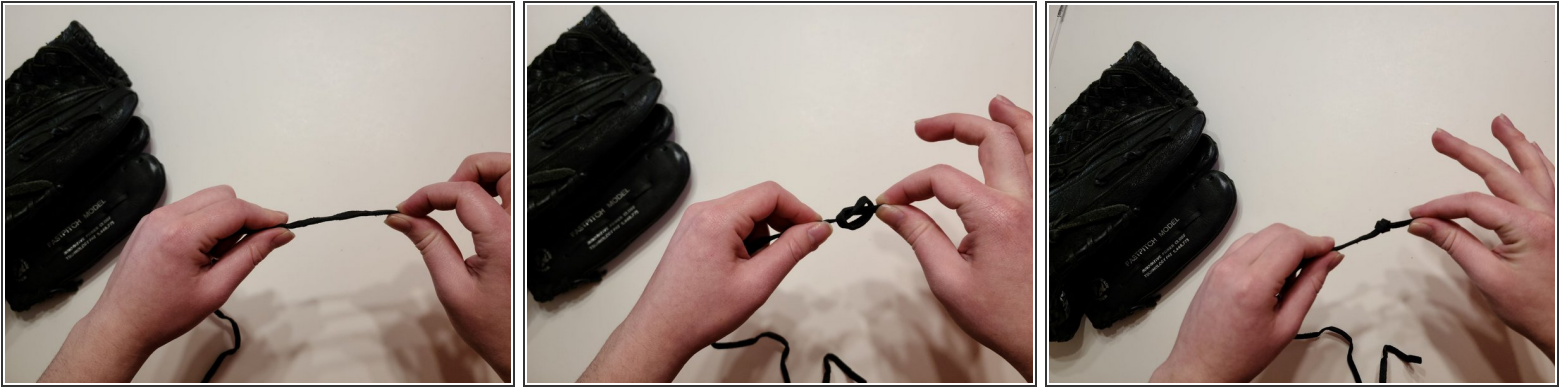

If your softball glove has a broken string, you need to restring it before you can play again. This guide will show you how to restring the fingers of your softball glove, making your glove as good as new. When restringing your glove, make sure the smooth part of the string is facing outwards. This is important so the string doesn't slide or move around when you're playing catch. Also, leather glove conditioner will make this process easier and smoother, but it is not required.

TOOLS:

- [Utility Scissors](#) (1)
 - [Softball and Baseball Glove Lace Kit](#) (1)
-

Step 1 — Softball Glove String

- Tie a knot at one end of the string.

Step 2

- Put the string through the loop of the leather needle.

Step 3

- Push the needle through the first hole on the backside of the pinky finger.

Step 4

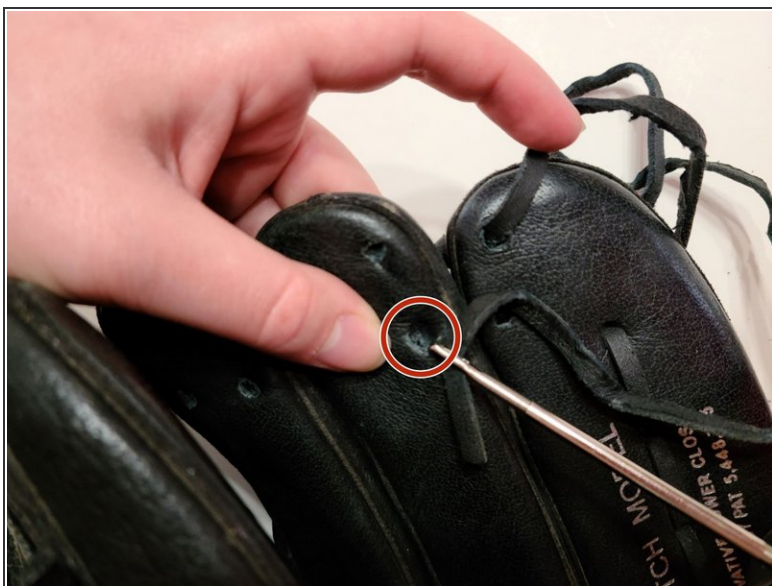

- Pull the string out of the needle and back the needle out of the hole.

Step 5

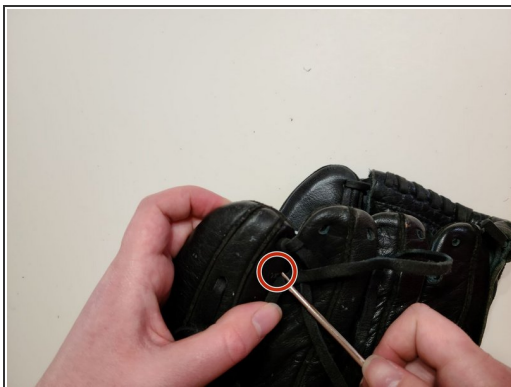

- Pull the string all the way through and reinsert the string into the needle.

Step 6

- Push the needle through the bottom hole on the ring finger.
- Pull the string out of the needle and all the way through the hole. Back the needle out of the hole.

Step 7

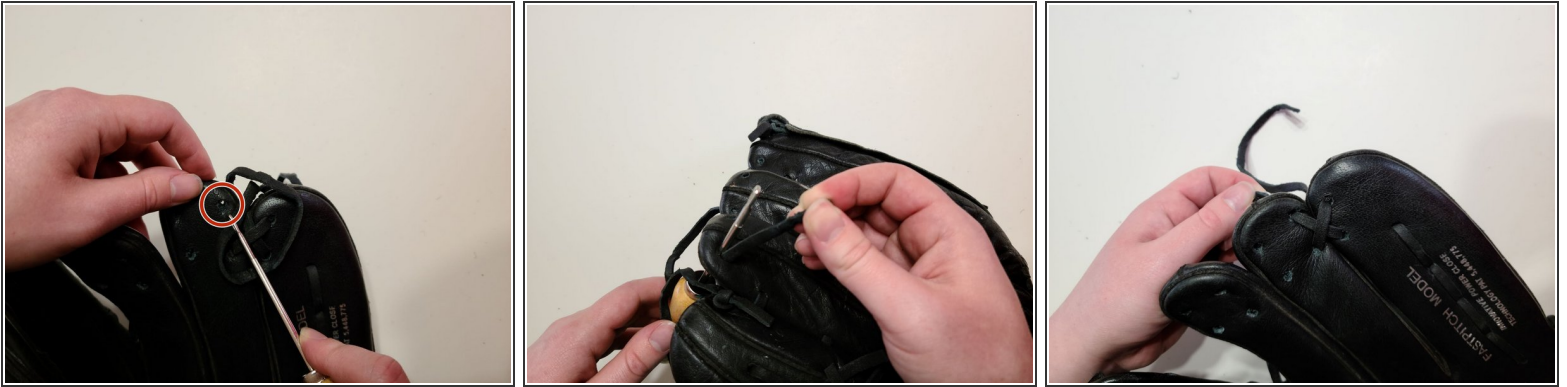

- Insert the string back into the needle and push it through the bottom hole on the pinky.
- Pull the string all the way through and remove it from the needle.

Step 8

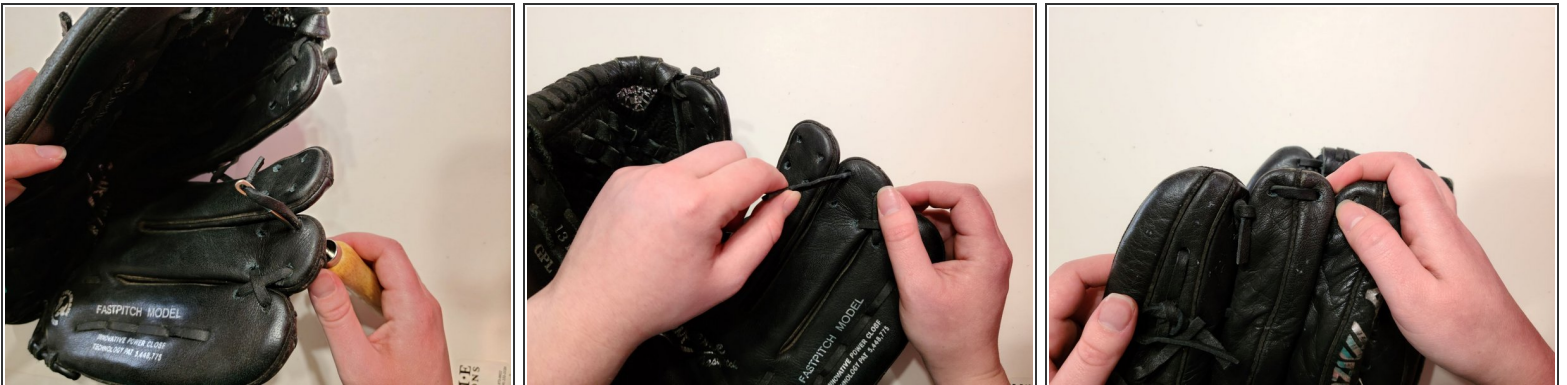

- Pull the string under the loop, making an X.

Step 9

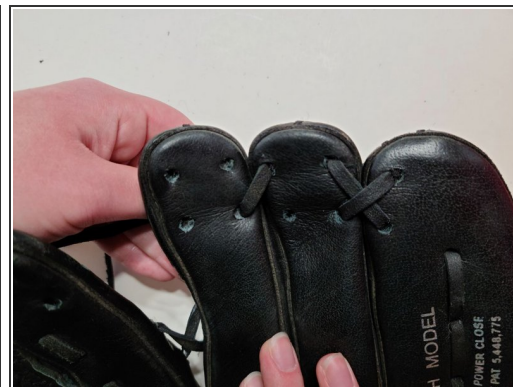

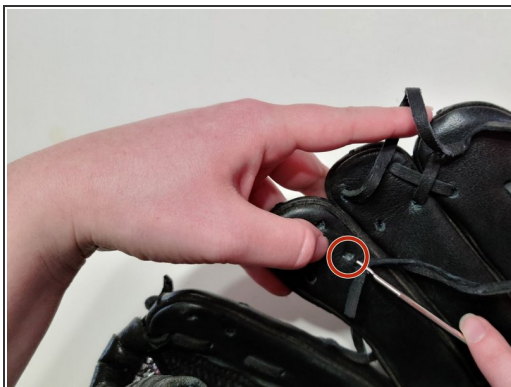

- Put the string through the needle and push the needle through the top hole on the ring finger.
- Pull the string all the way through and remove it from the needle.

Step 10

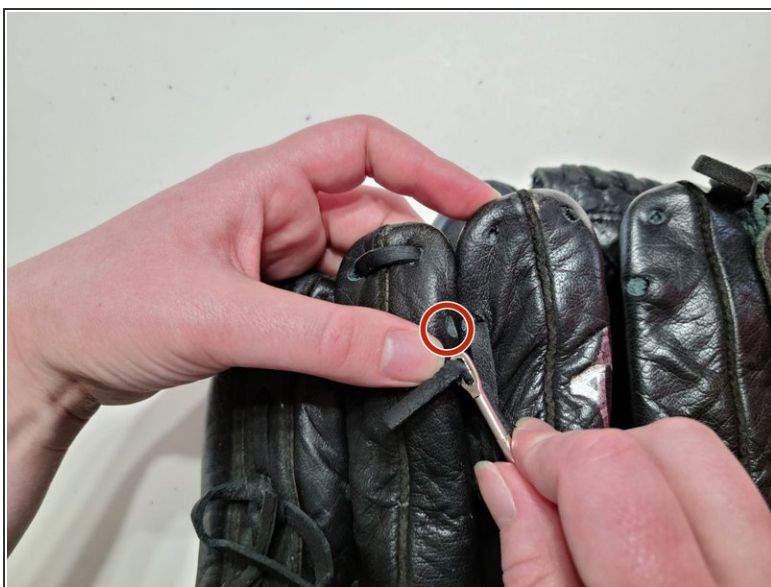

- Going around the back of the ring finger, insert the string through the top hole on the left side of the ring finger.
- Pull the string all the way through.

Step 11

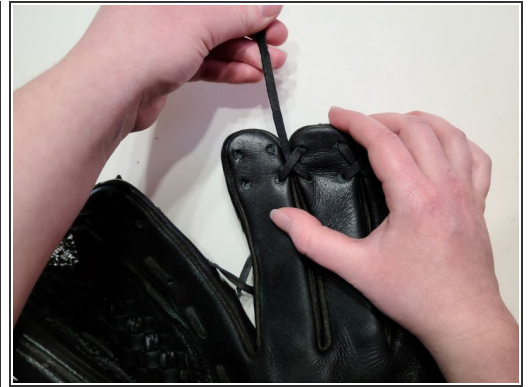

- Insert the string through the bottom hole on the middle finger.
- Pull the string all the way through.

Step 12

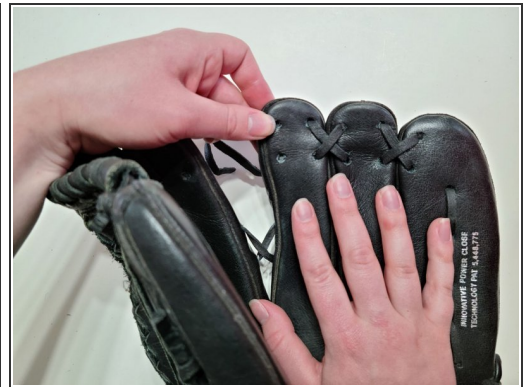

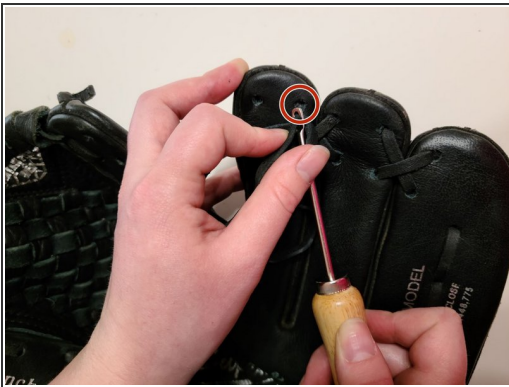

- Cross over the backside and insert the string into the bottom hole on the left side of the ring finger.

Step 13

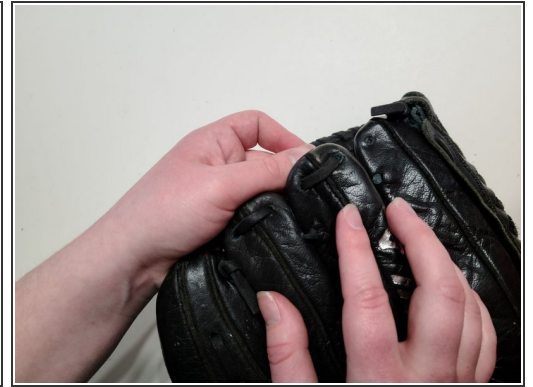

- Pull the string under the loop to make an X.

Step 14

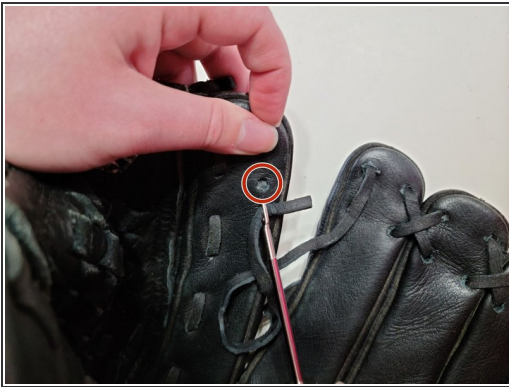

- Push the string through the top hole on the right side of the middle finger.
- Pull the string all the way through.

Step 15

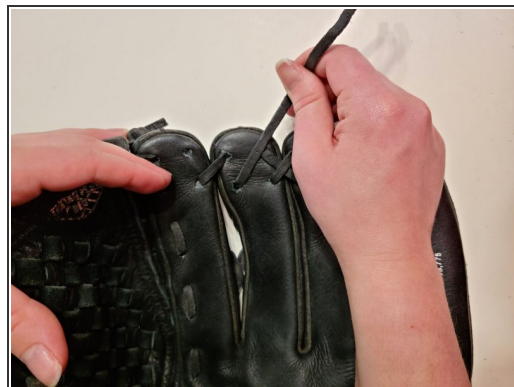

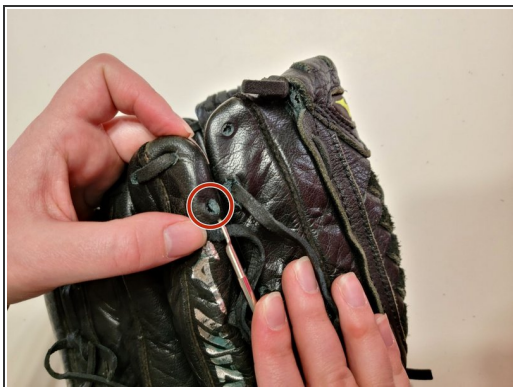

- Going around the back of the middle finger, insert the string into top hole on the right side of the middle finger.
- Pull the string all the way through.

Step 16

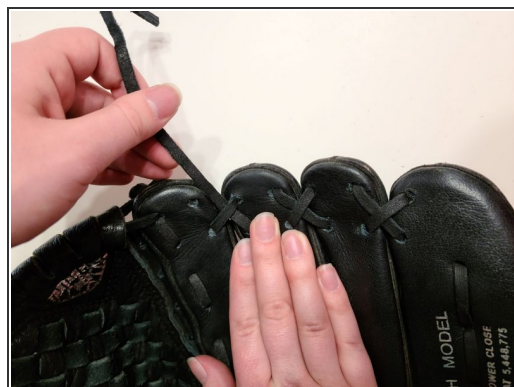

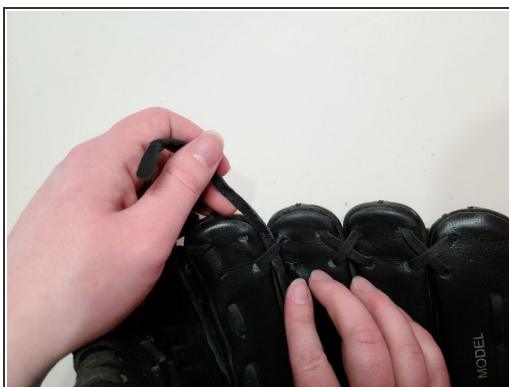

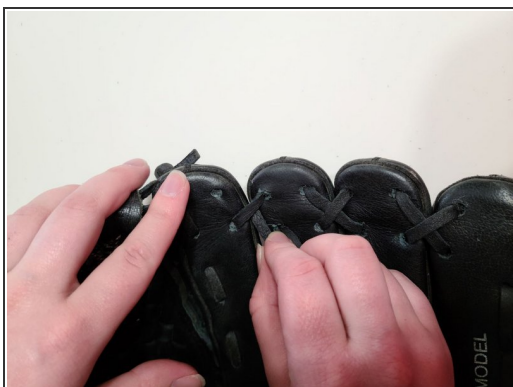

- Insert the string into the bottom right hole on the pointer finger.
- Pull the string all the way through.

Step 17

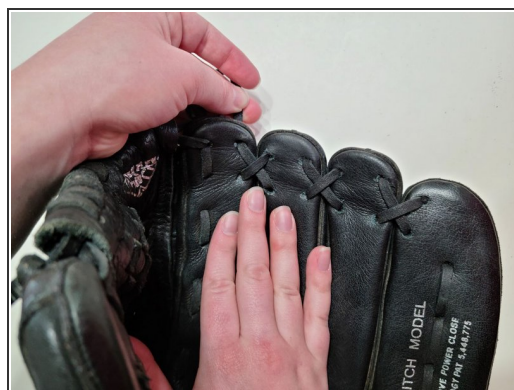

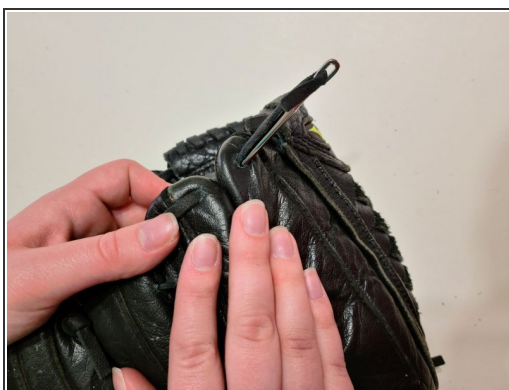

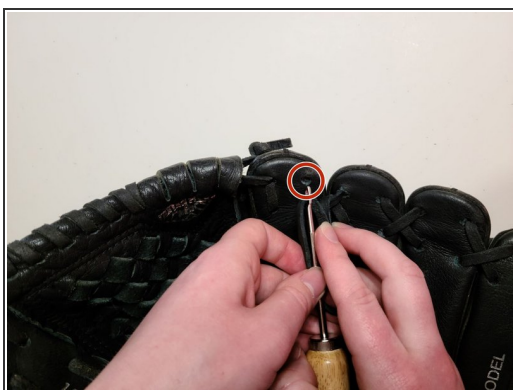

- On the backside, push the string through the bottom left hole on the middle finger and pull the string all the way through.

Step 18

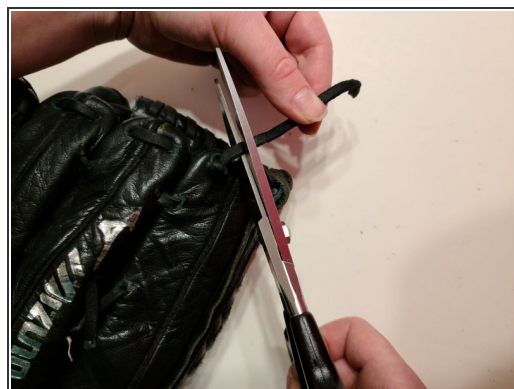

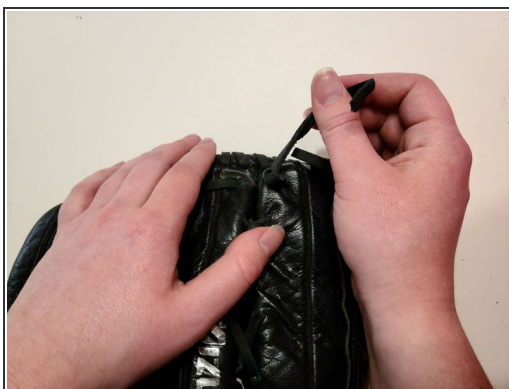

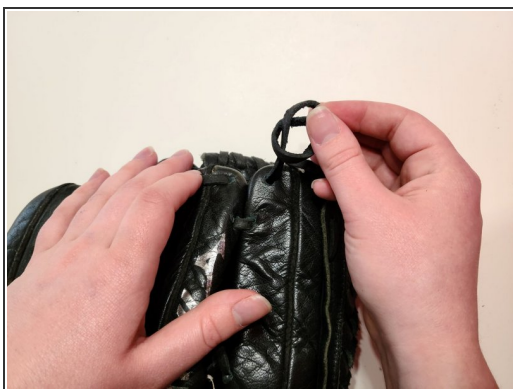

- Pull the string under the loop, making an X.

Step 19

- Insert the string into the top right hole on the pointer finger and pull the string all the way through.

Step 20

- Tie the end of the string close to the glove.
- Cut off the excess string.

To remove a string from a softball glove, repeat these steps in reverse order.
