

# How to Open the Right Handle of the Backbone One

How to open the right controller handle of the Backbone One for repairs and modding.

Written By: Adriana Zwink

---

## INTRODUCTION

Use this guide to open the right controller handle of the Backbone One for repairs and modding.

---

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

## Step 1 — Remove the screws

- Use a Phillips screwdriver to remove the four 5.9 mm-long screws.

## Step 2 — Rotate the upper part

- Lift up the upper cover of the controller.
- Swing the upper cover over and place it on the controller case.

⚠ Make sure that the interconnecting cable has no tension.

To reassemble your device, follow these instructions in reverse order.
