INTRODUCTION

Car lights are just like regular lights that we have in our homes and as we know they don't last forever. Over time, the filament (conducting wire) oxidizes and becomes more and more brittle, until it breaks apart and the light goes out. Due to cars being outside for the most part atmospheric conditions can shorten the lifespan of the lights in a car. Front parking lights are very important, they reduce the chance of cars crashing while parking by indicating that the car is in reverse and this guide will show how to replace a front parking light in a Mercedes c230K (2014) avoiding extra expenses by replacing it yourself.

⚙ PARTS:

- Front Parking Light (1)

Step 1 — Front Parking Light

- Turn off the car lights.

Step 2

- Open the car hood by pulling the red lever placed under the light switch.
