

2018 Kia Sportage Cabin Air Filter Replacement

This guide is for the replacement of a 2018 Kia Sportage cabin air filter.

Written By: Callie Shannahan

INTRODUCTION

This guide will show you how to replace your 2018 Kia Sportage Cabin Air Filter. Air filters are an important part of an air conditioning system, as they can keep air clean and fresh. Replacing air filters can be useful, as they can become dirty from collecting allergens like pollen, mold, and dust. It is also important for maintaining a properly functioning air conditioning system. Kia recommends replacing the cabin air filter every 10,000 miles in extreme conditions, or 15,000 to 30,000 miles in typical driving conditions. Kia also recommends replacing the cabin air filter with original Kia cabin air filters such as the Kia (D9H79-AK000), but there are many other options such as the Premium Guard PC99155 and the ECOGARD XC10490.

PARTS:

- [Kia \(D9H79-AK000\)](#) (1)
 - [Premium Guard PC99155](#) (1)
 - [ECOGARD XC10490](#) (1)
-

Step 1 — Cabin Air Filter

- Open the glove box on the passenger side of the car.
- Empty any items out of the glove box.

Step 2

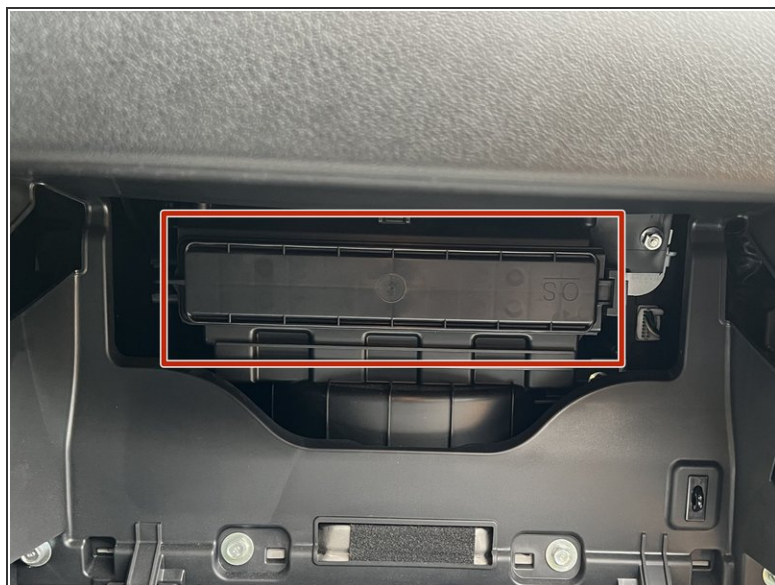

- Twist the two circular knobs on the side walls of the glove box until they come loose.
- Pull out the knobs and set them somewhere safe.

Step 3

- Carefully disconnect the latch on the right side of the glove box by pulling the latch away from the main glove box.

Step 4

- Locate the rectangular air filter compartment directly behind the glove box.

Step 5

- Pinch the left side of the filter cover.
- Pull the filter cover towards the passenger seat to open it.

Step 6

- Grab the cabin air filter on two sides.
- Pull out the cabin air filter.

To reassemble your device, follow these instructions in reverse order.
