# INTRODUCTION

With this guide, you will be able to clean the fans and vents inside your laptop. These components help cool down all other components inside your device, preventing them from over heating. Loud noises coming from your laptop could potentially be caused by a dirty fan.

---

## TOOLS:

[Phillips #0 Screwdriver](#) (1)

[iFixit Opening Tool](#) (1)

[Microfiber Cleaning Cloths](#) (1)

---

## Step 1 — How to Clean the Fans and Vents of an Asus Vivobook Flip 14

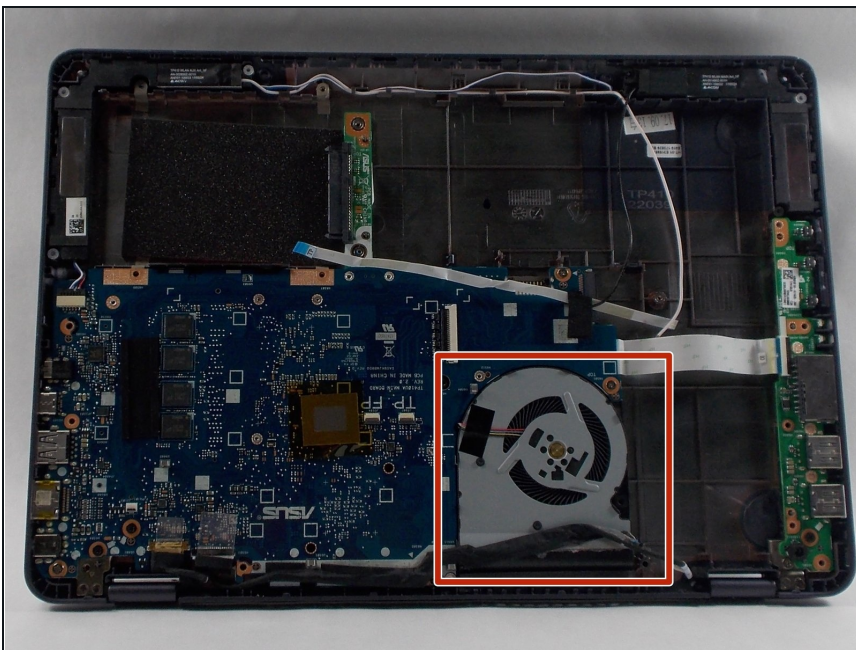

- Assure your laptop is disconnected from the power supply.

## Step 2

- Remove all screws with a Phillips #0 screwdriver.
- Remove the back cover using the opening tools from the iFixit toolkit.

## Step 3

- Using a [MicroFiber cloth](#), clean the fan thoroughly.

---

To reassemble your device, follow these instructions in reverse order.
