

How to clean the SAECO Incanto SBS Spout

Cleaning the SPS Spout in order to ensure proper coffee dispensing.

Written By: Schwarzstein

INTRODUCTION

If coffee is only coming out of one spout or the knob isn't having any effect on the volume of crema, a cleaning may be in order. This guide will show you how to disassemble, clean and reassemble the spout.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
 - [Detailing Brush](#) (1)
-

Step 1 — How to clean the SAECO Incanto SBS Spout

- Remove the spout by pressing the button on top and sliding it towards you.
- Unscrew the two PH#1 screws on the back of the spout.
- The spout halves should now separate easily but light prying might be necessary.

Step 2

- Remove the spring of the pushbutton. Release the Button and remove the black insert off the cup filler.
- Push off the metal chrome part.
- Clean it with a small brush and rinse it under water.

Step 3

- Reinstall the metal part on the back cup filler part then insert the black piece.
- Hold up the black part a little for pushing in the Button.
- Then click it together and push in the spring.

Step 4

- Click it together, put in the two screws and you are done. :)

To reassemble your device, follow these instructions in reverse order.
