

# Philips SBA1060 Speaker Replacement

The speakers are the two circular objects...

Written By: April Driscoll

# INTRODUCTION

The speakers are the two circular objects inside the device. This guide will detail the steps in how to replace a damaged speaker.

---

## TOOLS:

[Phillips #0 Screwdriver](#) (1)  
[Spudger](#) (1)  
[iFixit Opening Tool](#) (1)  
[Polyurethane Glue](#) (1)

## PARTS:

[Speaker](#) (1)

---

## Step 1 — Battery Casing

- Remove the back cover by sliding it off.
- Remove the 3 AAA batteries.

## Step 2

- Unscrew the nine exterior screws on the back panel using a PH0-size Philips-head screwdriver.
  - ⓘ A larger screwdriver head and more force may be required for damaged screws.
- Remove the triangular end piece by pulling it straight off.

## Step 3

- Remove the colored grill by sliding it off in the direction of the removed end piece.
- Pry off the back battery panel with the plastic opening tool.
  - ⚠ Be careful to avoid tearing any wires.

## Step 4 — Speaker

- Remove the circuit board by unscrewing the two interior screws located on the circuit board.
- Pull out the battery plugs from the circuit board by pulling out the plugs to fully remove the back panel from the rest of the speaker.

## Step 5

- Locate the speaker needing replacing.
- Remove the one screw holding the speaker in place with a PH0 size philips head screw driver.

## Step 6

- Score the glue that is holding the speaker in place with the spudger, and use your hands to pry off the speaker.

## Step 7

- Using a non-conductive glue, carefully seal the speaker to the casing.
- Follow the glue instructions as set by the manufacturers. Let the glue set the appropriate amount of time.
- Reassemble the device

---

To reassemble your device, follow these instructions in reverse order.
