TOOLS:

- [iFixit Opening Tools](#) (1)
 - [Phillips #1 Screwdriver](#) (1)
-

Step 1 — HDD / RAM Memory / WiFi card

- Remove the battery.
- Unscrew 2x screws M 2.5x8.0

Step 2

- With a plastic tool remove the Memory RAM / Hard Drive / Wifi Cover Door

Step 3

- Drag the SATA HDD to release it.
- Unscrew 4x screws to remove the disk from the HDD Caddy Holder.

Step 4

- Use plastic tool to release the DDR3 RAM memory module from the locking clips.
- The RAM memory modules have a key notch position to prevent putting the board incorrectly.

Step 5

- To release the Half Mini PCI WiFi card, unscrew the screw and disconnect the coaxial antenna cable.
- **Did you do it successfully?**
