🔧 TOOLS:

- Phillips #00 Screwdriver (1)
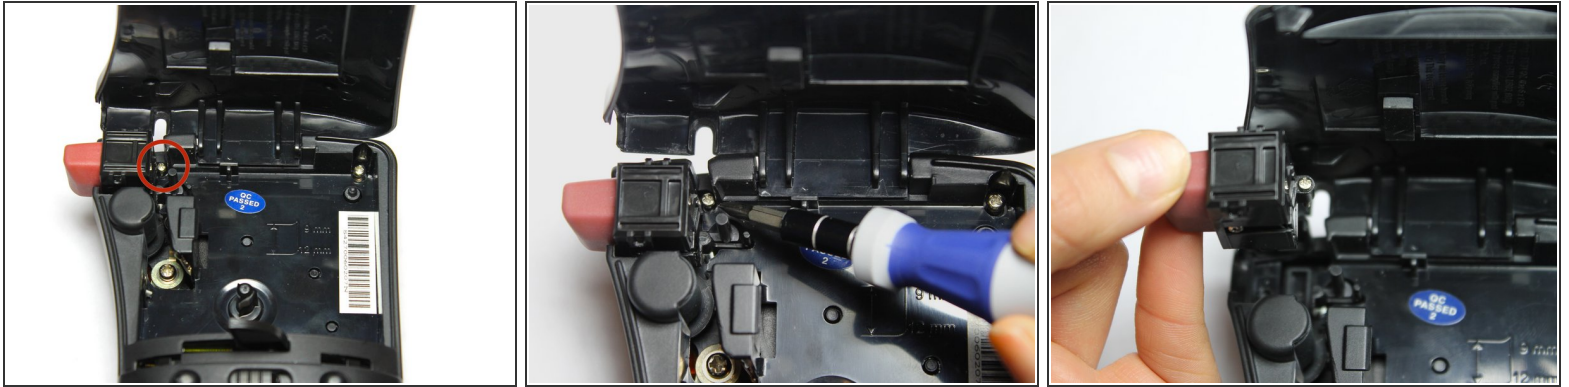

Step 1 — Rear Panel

- Slide the panel release button.

- Lift the panel.

## Step 2 — Remove Label Tape Cassette

- Firmly press the cartridge release button with your finger.
  - You may need to hold the cassette and/or entire device still while pressing the button.
- Lift the label tape cassette out of the device.

Step 3 — Blade Disassembly

- Use Phillips #00 Screwdriver to disengage cutter from device

- Remove cutter

Step 4 — Remove Blade

- Use Phillips #00 screw to unscrew blade from blade cutter

⚠ Carefully remove blade. The blade is sharp and can be dangerous if not handled properly.

- Replace blade

To reassemble your device, follow these instructions in reverse order.
