#### **INTRODUCTION**

The following guide details the necessary steps that you have to follow in order to replace the vibration motor for the Lenovo IdeaTab S6000.

## **TOOLS:**

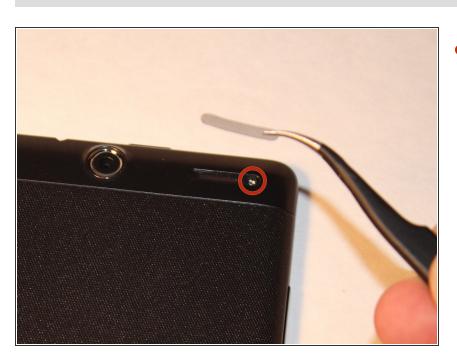

- Phillips #00 Screwdriver (1)
- iFixit Opening Tools (1)
- Spudger (1)

#### Step 1 — Battery

- Remove the speaker screens by working them loose with a plastic opening tool. You may need to first loosen them with tweezers or a craft knife.
- ↑ These screens are held in place by glue that is hard to remove. Please take your time to ensure that that this step is done correctly.

#### Step 2

 Remove the screws from both of the spots that were covered.

#### Step 3

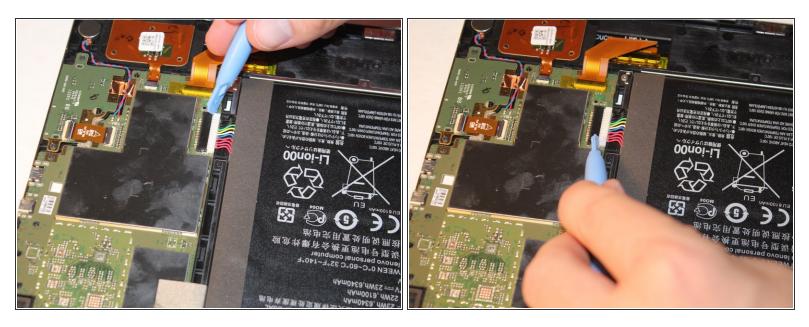

- ↑ DO NOT USE A METAL TOOL FOR THIS.
- Go all around the casing, prying the screen away from the backing with the spudger.
- It will make a popping sound each time one of the lock tabs is disconnected.
- (i) Take your time as you move all around the device when prying the backing off.

#### Step 4

 Pull off the plastic that is covering the battery cable.

#### Step 5

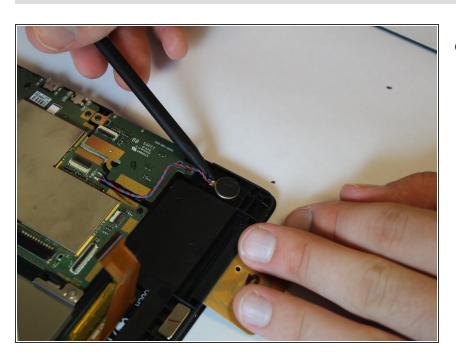

Using either the plastic opening tool or your fingers, gently pull on both sides of the plug to release
it.

## Step 6

- Remove the battery by grabbing the tab shown and pulling up.
- The battery is held to the device by adhesive. Pull the battery up from the tab and it will lift out with a bit of effort.

## Step 7 — Vibration Motor

 Use the spudger to pry up the vibration motor.

To reassemble your device, follow these instructions in reverse order.
