Step 1 — Back Cover

- Using the plastic opening tools, insert it into the edge and pry open.

- Use hands to help pull the back off from the front if needed.
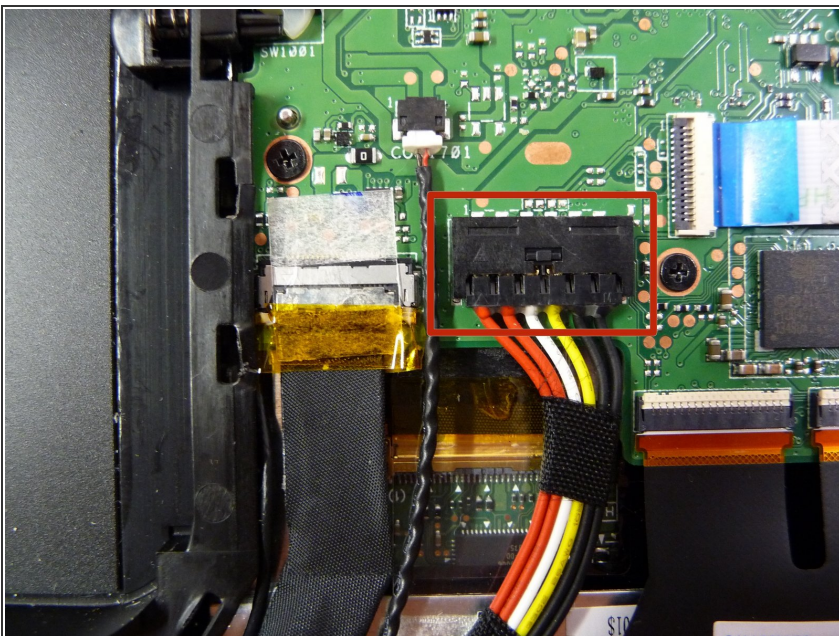

Step 2 — Finding the Battery

- Locate 4600mAh Battery
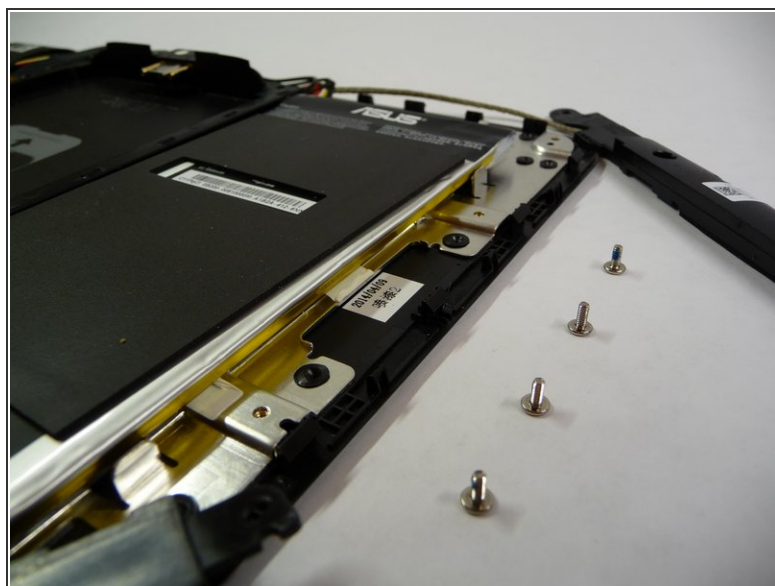

Step 3 — Removing the Protective Cover

- Locate (+) and (-) battery terminals
  - Trace black, white, red, and yellow wires to connection on motherboard
- Remove protective plastic cover with tweezers
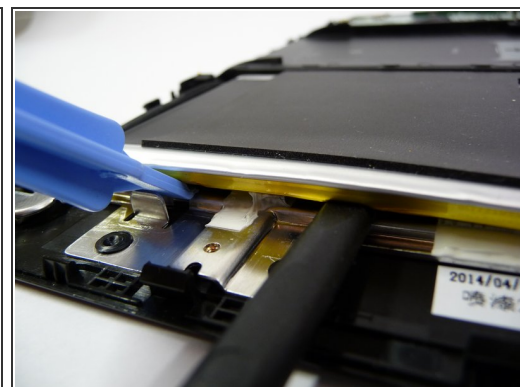

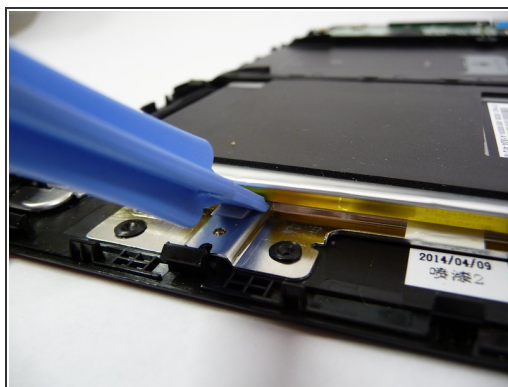

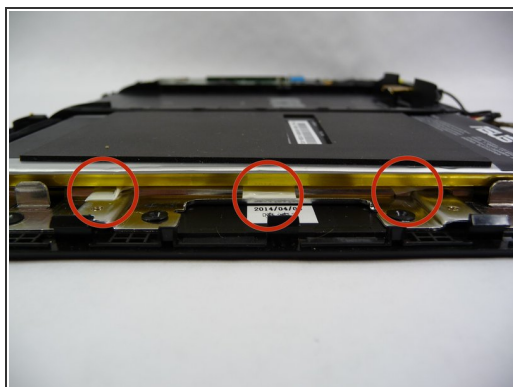

Step 4 — Disconnecting the Ribbon

- Disconnect connect ribbon by gently pulling with fingers

- ⚠ Ensure the ribbon does not touch metallic items (This may short out battery and cause an explosion)
