INTRODUCTION

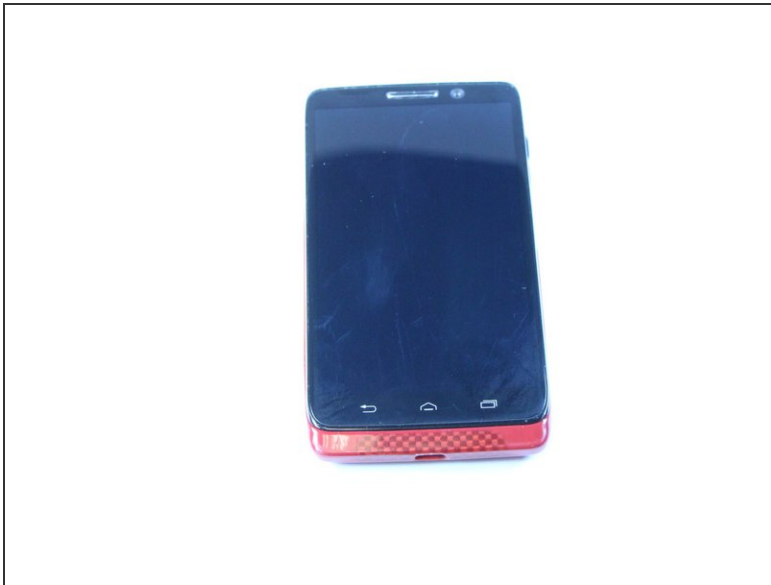

The back case of the Motorola Droid Mini is plastic and can be easily cracked. Replacing this back case is simple and requires only one tool.

TOOLS:

- [iFixit Opening Tool](#) (1)
-

Step 1 — Back Case

- Pull out the volume keys using the iFixit opening tool.

Step 2

- Pry off the back case gently using the iFixit opening tool.

- ⓘ Make sure to go around the entire perimeter of the case.

To reassemble your device, follow these instructions in reverse order.
