How To Re-String A Hoodie

Put a string in the hood of a sweatshirt.

Written By: Ashley

INTRODUCTION

Has the string in your hoodie come out in the wash? Do you want to change the string in your hoodie to one of a different color? No matter what your reasoning may be for wanting to restring your hoodie, use this guide to learn how to put a string back in the hood of a sweatshirt.
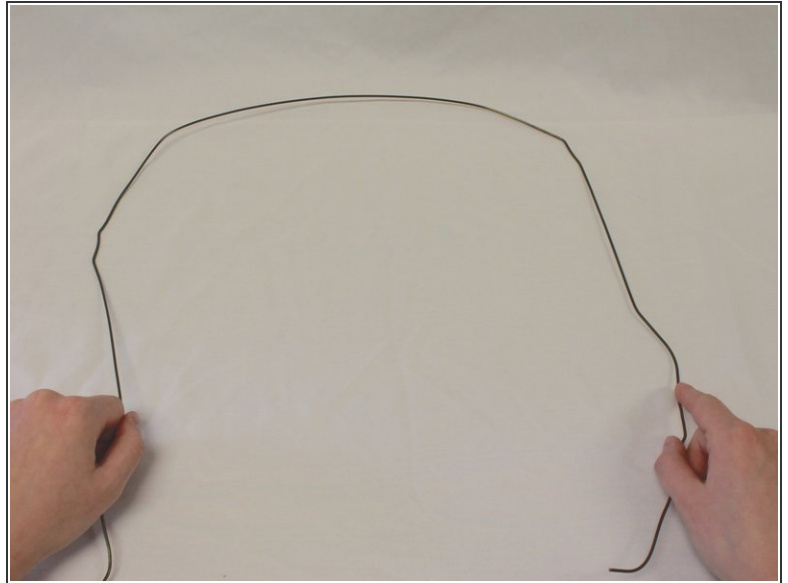

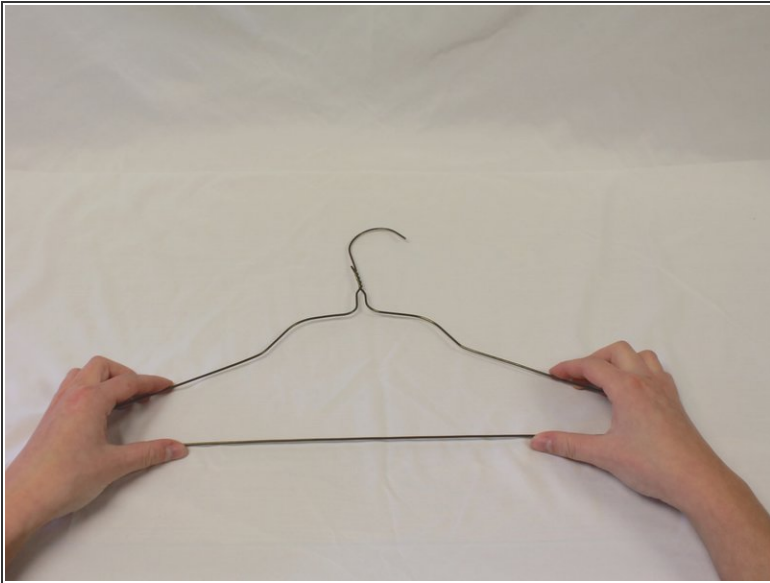

🔧 TOOLS:

- Masking Tape (1)
- Wire Coat Hanger (1)

⚙ PARTS:

- Hooded Sweatshirt (1)
- String to go in Hood (1)

Step 1 — How To Re-String A Hoodie

- Uncoil the wire coat hanger into a straight line.

Step 2
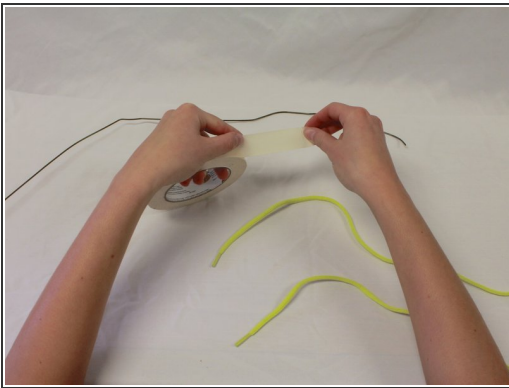

- Tape the end of the uncoiled coat hanger to one end of your sweatshirt string.

- ⓘ Make sure the clothes hanger is securely taped to ensure that the string doesn't detach during the re-stringing process.

- ⓘ When taping, make sure no adhesive is felt over the outside of the apparatus. This will make the re-stringing process easier because the tape won't be sticking to the sweatshirt.

Step 3

- Insert the wire and string apparatus into the left opening of the hoodie.

Step 4

- Feed the wire through the hoodie until it reaches the top of the hood.

Step 5

- Curve the wire to the right so that the wire can follow the curve of the hood.

Step 6

- Continue feeding the wire through the hood towards the other opening of the hoodie.

- Pull the wire and string out of the opening.

Step 7

- Remove the tape from the end of the wire and string.

Step 8

- Remove the wire from the hoodie by pushing the left end of the wire through the hoodie, while pulling the right end out.

Step 9

- Tie each end of the string in a knot to prevent the string from coming out of the hoodie.

Congratulations on restringing your hoodie!
