

2011-2013 Scion tC Front Dome Light Replacement

How to replace the overhead lighting systems in the front of the cabin.

Written By: Nick d'Alencon

PARTS:

- [Dome light replacement bulb](#) (1)
-

Step 1 — Front Dome Light

- Remove the plastic covering of the lights by pulling it down quickly from the windshield side.

Step 2

- Disconnect the plastic header from system by pressing inward on the side tabs.

Step 3

- Turn blue knobs counter clockwise and pull to remove bulb housing.

Step 4

- Pull burnt bulb out of knob/housing.
- ⓘ When inserting the replacement, take note of the direction and polarity of the unit.

To reassemble the dome, follow these instructions in reverse order.
