## INTRODUCTION

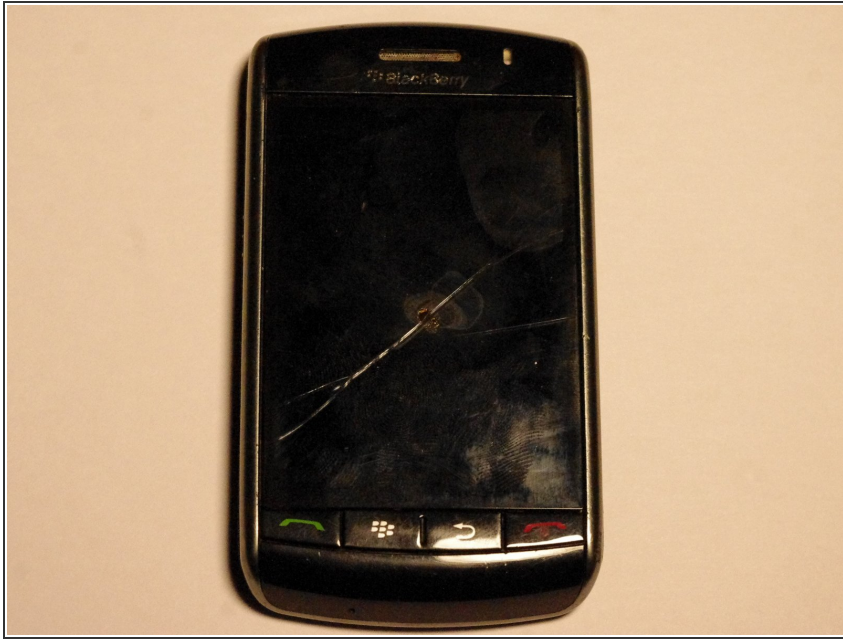

Need to get inside your BlackBerry Storm to fix it? Or just want to salvage parts? This is an easy to follow guide to do it!

### TOOLS:

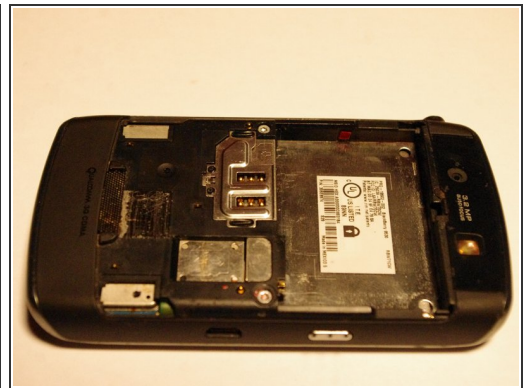

- [Essential Electronics Toolkit](#) (1)
-

## Step 1 — Motherboard

- Have a cracked screen? Need to replace your speaker? Etc? Well just follow these steps.

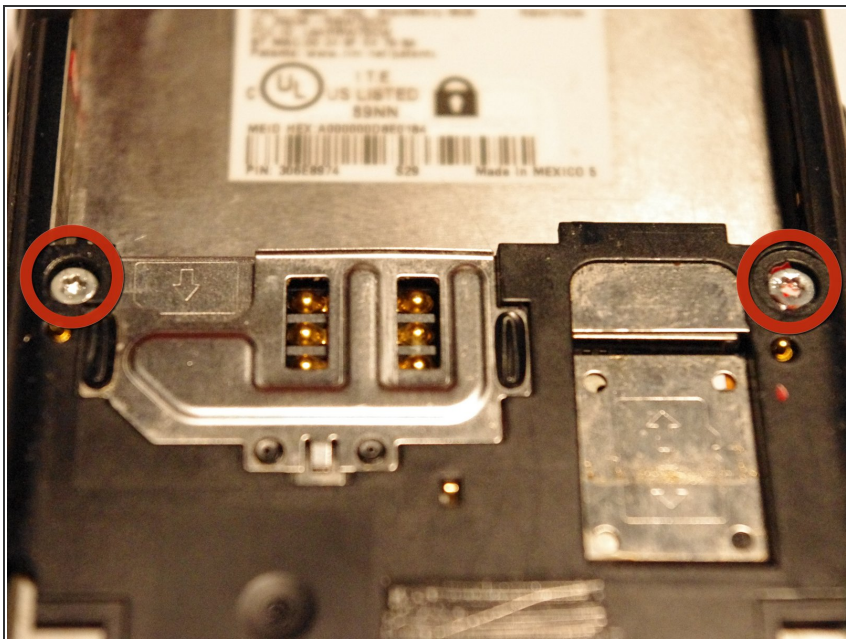

## Step 2

- Turn your Storm where the battery door is facing up.
- Remove the battery door.
- Remove the battery.

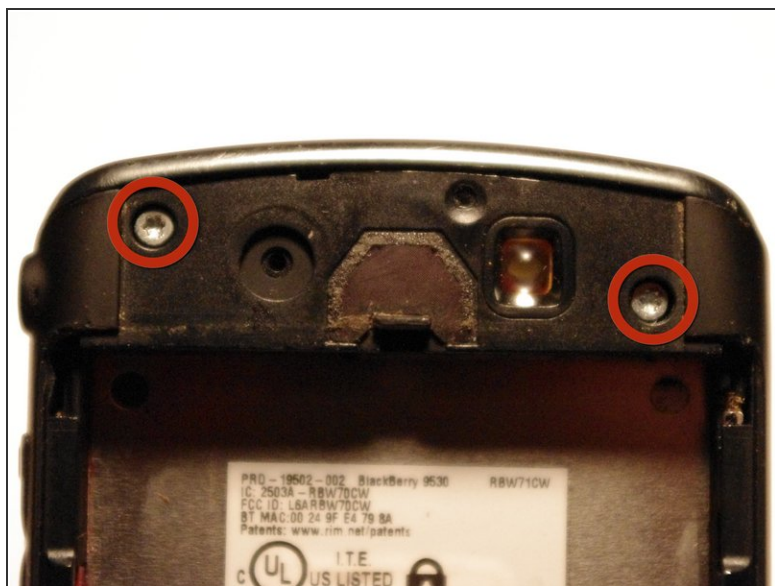

### Step 3

- Remove the two hex screws as shown by the SIM card slot.

### Step 4

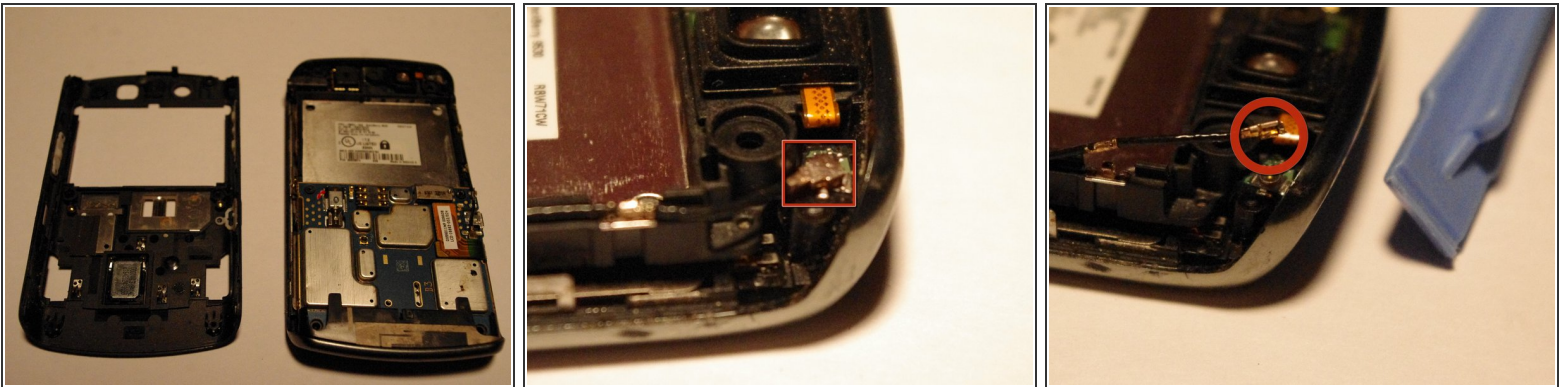

- Remove the plastic piece that covers the camera & flash on the back . This is held in with some tape so use a safe pry tool.
- Remove the two hex screws underneath it.

## Step 5

- Turn the phone over and remove the plastic cover under the buttons as shown.
- Remove the 2 screws underneath.

## Step 6

- Go around your device with the plastic pry tool, there a 3 clips on each side of the housing.
- There is a connection for the antenna from the front to mid housing. Remove it with a pry tool if it does not come off by itself.

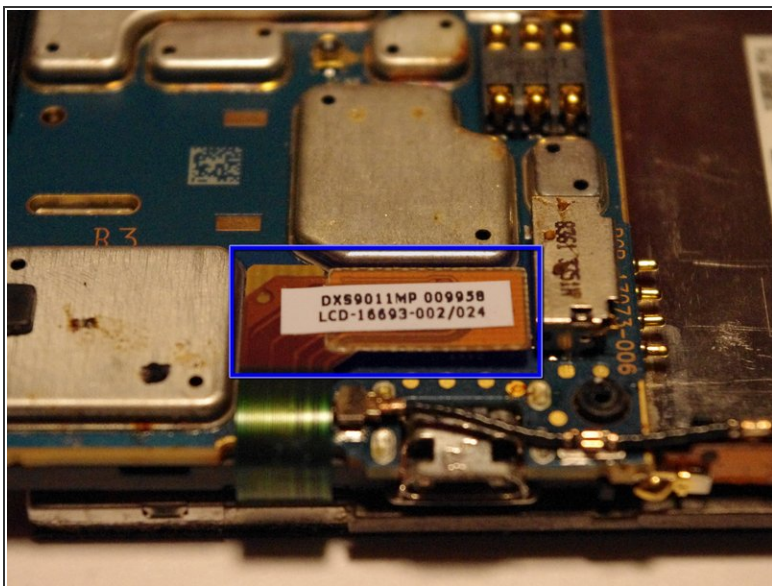

## Step 7

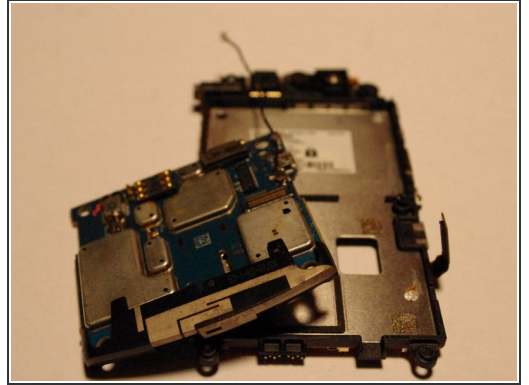

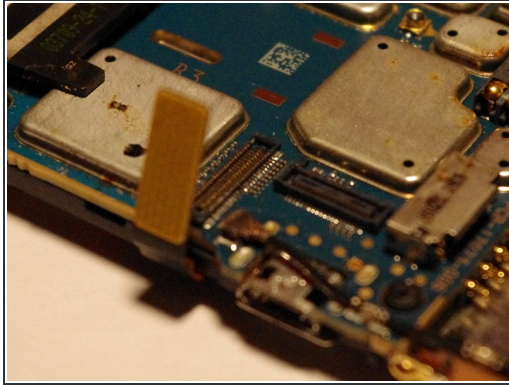

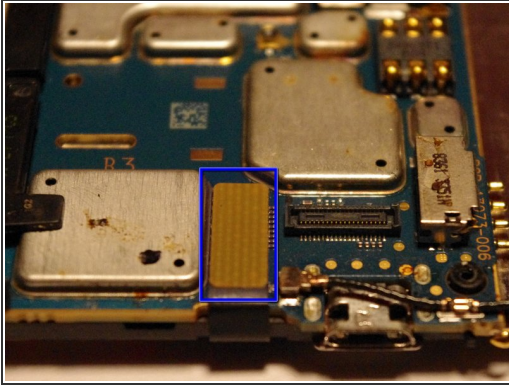

- You now have 3 pieces. The rear, mid , & front housing.

## Step 8

- To remove the screen gently pry up this ribbon cable with a pry tool.

## Step 9

- To remove the main board from the mid housing disconnect the ribbon cable as pictured.
- Now follow in reverse order for reassembly!

To reassemble your device, follow these instructions in reverse order.
