INTRODUCTION

This guide tells you how to remove a faulty logic board and install a new one.

🔧 TOOLS:

Phillips #00 Screwdriver (1)
iFixit Opening Tool (1)
Tweezers (1)

Step 1 — Battery

- Push down on the back cover of the phone, then remove the back cover.

Step 2

- Remove the battery.

Step 3 — Logic Board

- Remove the (4) 4.2 mm screws from the four corners of the battery slot.

Step 4

- Use plastic opening tools to peel off plastic Verizon logo tab from the top of the back outside.

- ⓘ Note: The tab is stuck on there with glue, this is alright, just peel it off.

Step 5

- Remove the (3) newly uncovered 4.3 mm screws.

Step 6
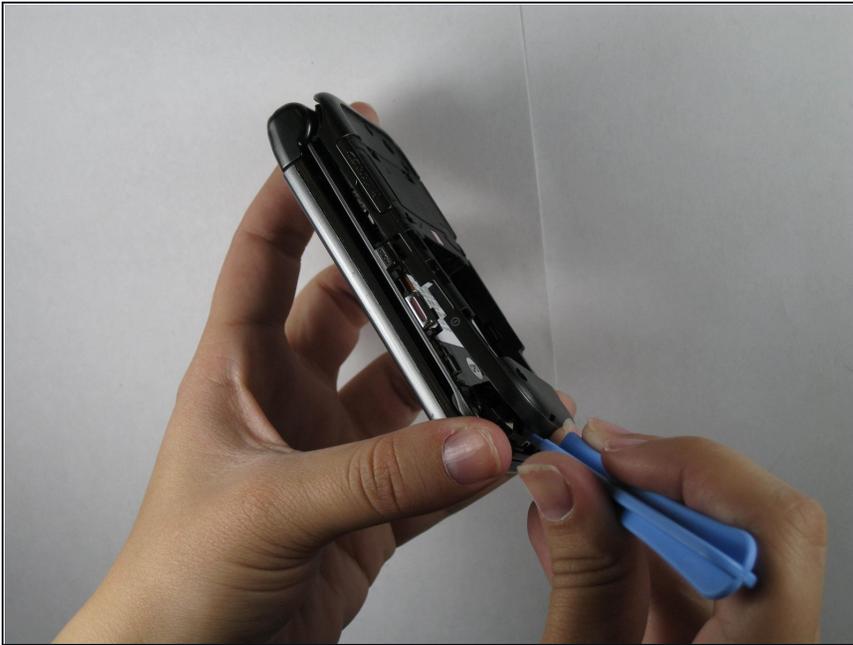

- Remove the back outside casing using the plastic opening tool.

- ⊡ Warning: Do Not lose the buttons on the side of the phone, as they will come off of the phone when you remove the back outside casing.

Step 7
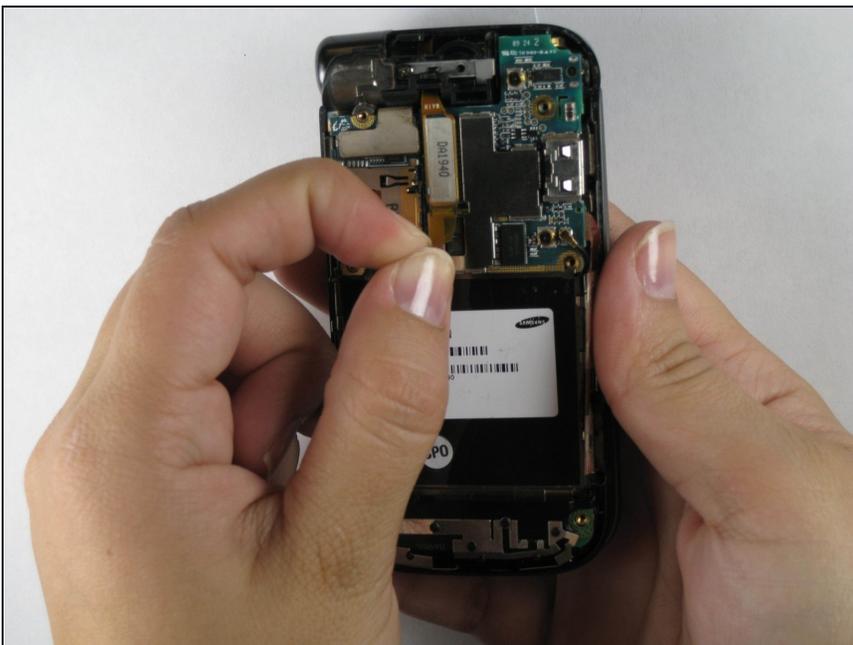

- Pull up on the yellow tab.

Step 8
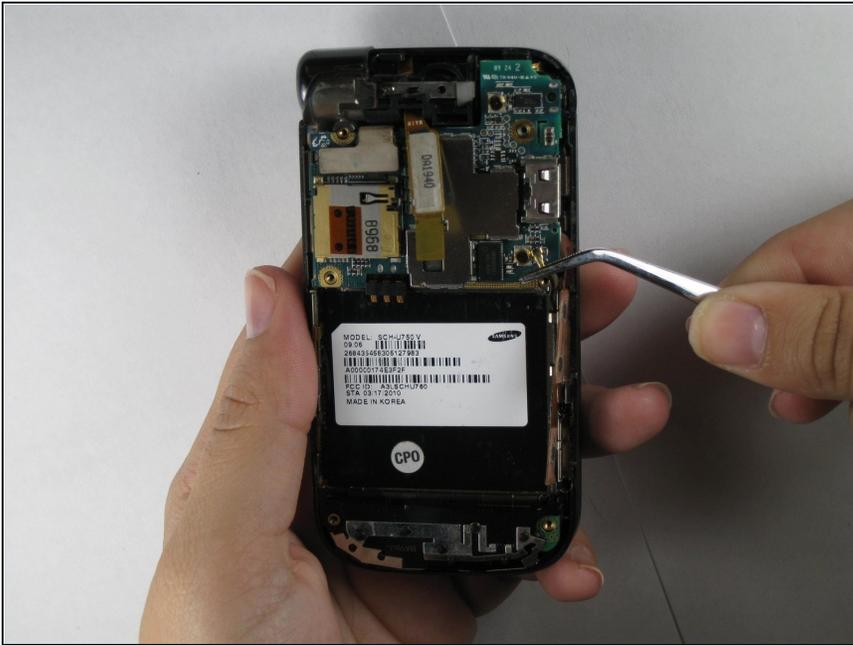

- Disconnect connecting cord using tweezers.

Step 9
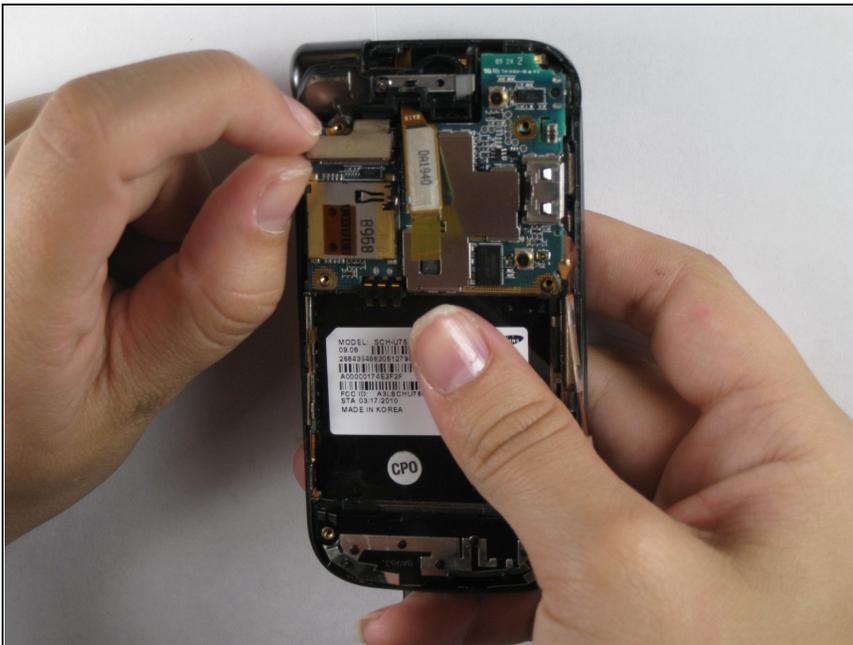

- Disconnect rectangular ribbon.

Step 10
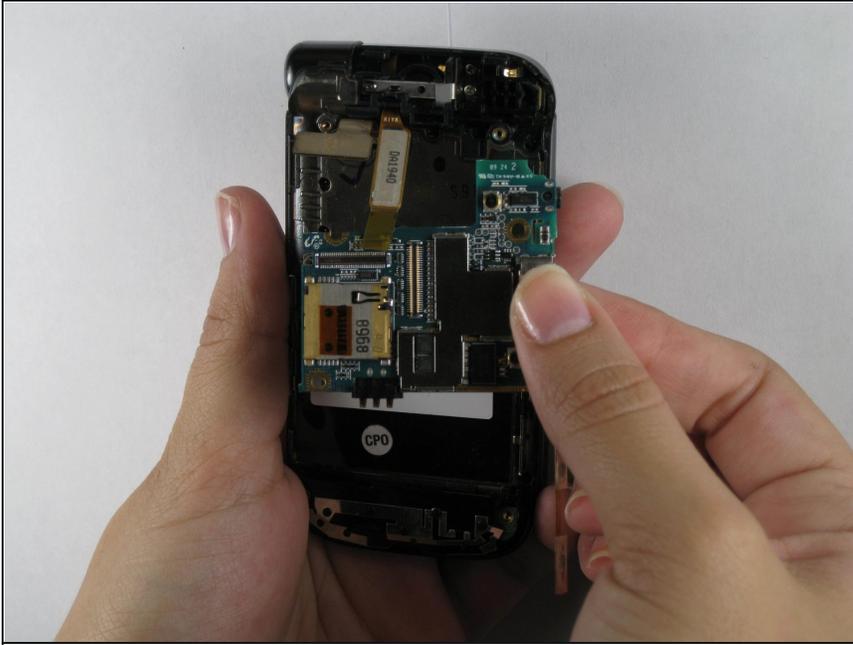

- Remove logic board.

To reassemble your device, follow these instructions in reverse order.
