

Palm m105 Batteries Replacement

This guide will help you to install and/or replace the batteries in the Palm m105.

Written By: Erik Thompson

INTRODUCTION

You will need to have a supply of AAA batteries for replacement. Can be found at most hardware and department stores. You can also order them online [here](#)

Step 1 — Batteries

- Press the latch on the battery door on the back of the device and pull outwards.
- ☑ Back the device up if possible, you may lose all your data if there is no power for a little too long for it to retain it, make sure this is done quickly.

Step 2

- Install two AAA alkaline batteries into the battery compartment, placing the positive and negative ends of the battery in the correct positions. (Shown as a diagram inside the battery compartment)
- Make sure to remove one battery at a time and replace with fresh battery. This will retain information on the device.

Step 3

- Place the battery door back into place on the back of the device; it will make a 'click' sound when properly reattached.

To reassemble your device, follow these instructions in reverse order.
