Step 1 — Front Panel

- Using a #00 Phillips screw driver, remove three 4.4 mm Phillips screws as indicated by the red circles.
Step 2

- Using your finger, peel back the textured grip so the components are separated.

Step 3

- Using the flat end of a spudger, loosen the connection between the front panel and the device.

- Remove the front panel using your hands.
Step 4 — Flash

- Pop the flash up with your thumb

Step 5

- Unscrew the two screws on the front of the flash near the bulb cover.

Step 6

- Close the flash.

- Lift the flash cover off.
