INTRODUCTION

This guide will show how to remove the battery for the Lenovo 100s Chromebook-11IBY. This removal will allow you to replace or upgrade the battery for your laptop.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

PARTS:

- [Lenovo 100S 11" Chromebook Replacement Battery](#) (1)

Step 1 — Battery

- Ensure your device is turned off and unplugged.

Step 2

- Use a Phillips #0 screwdriver to remove the nine 6mm screws from the larger back plate.

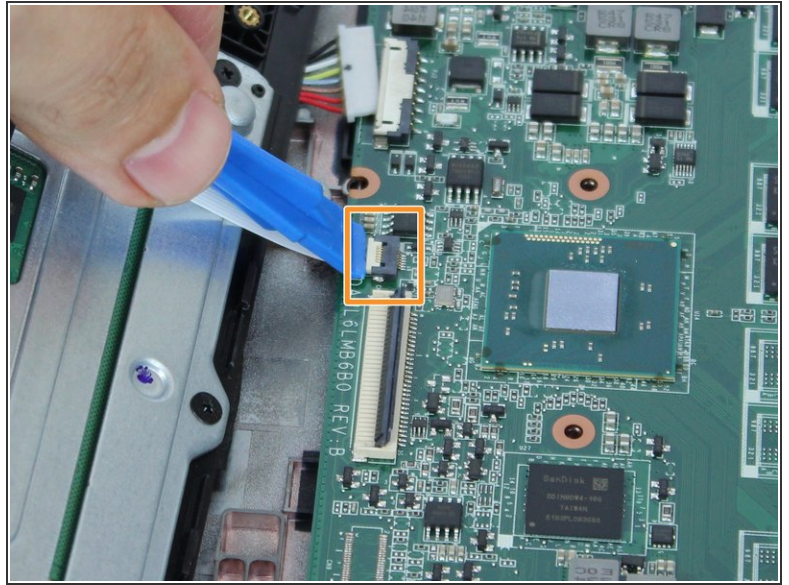

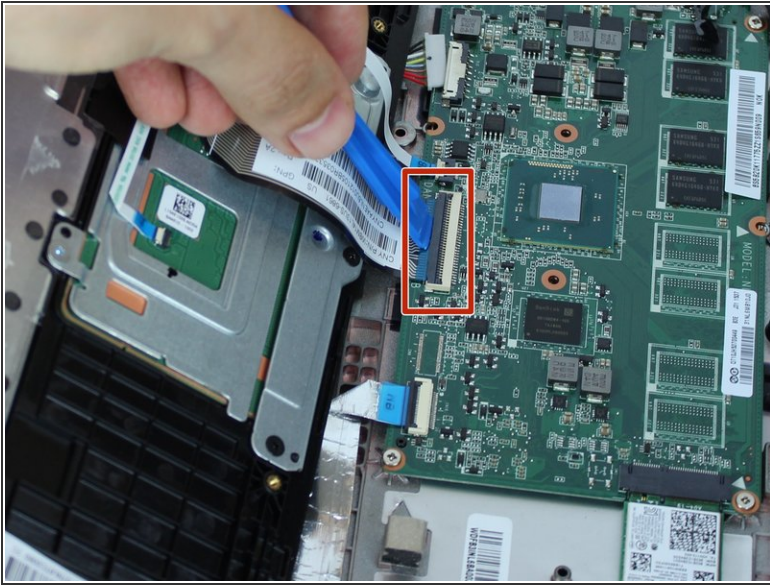

Step 3

- Turn your laptop back over, open it, and use the plastic opening tool on the recessed notch to gently pry each side and lift the keyboard plate up.

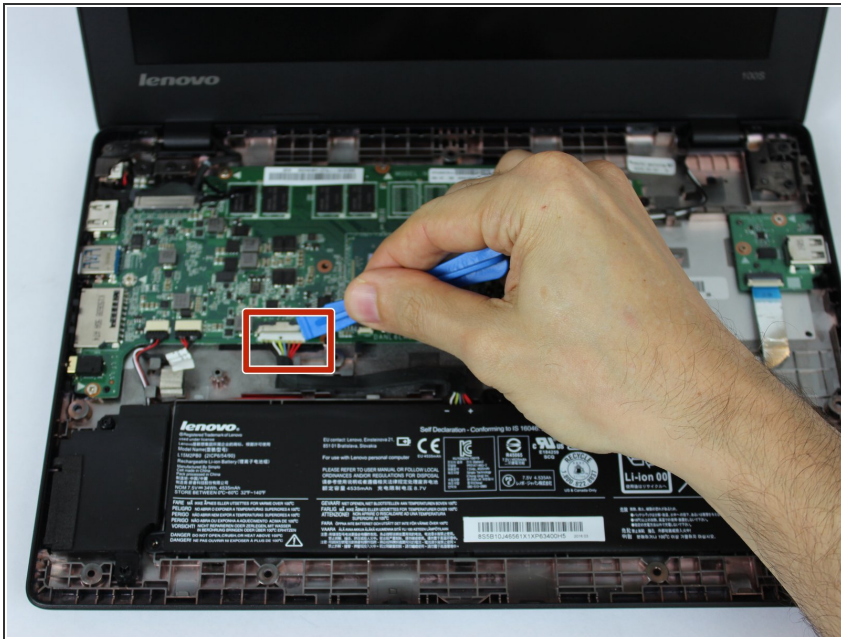

⚠ Be careful not to pull keyboard plate out immediately because cables are attached.

Step 4

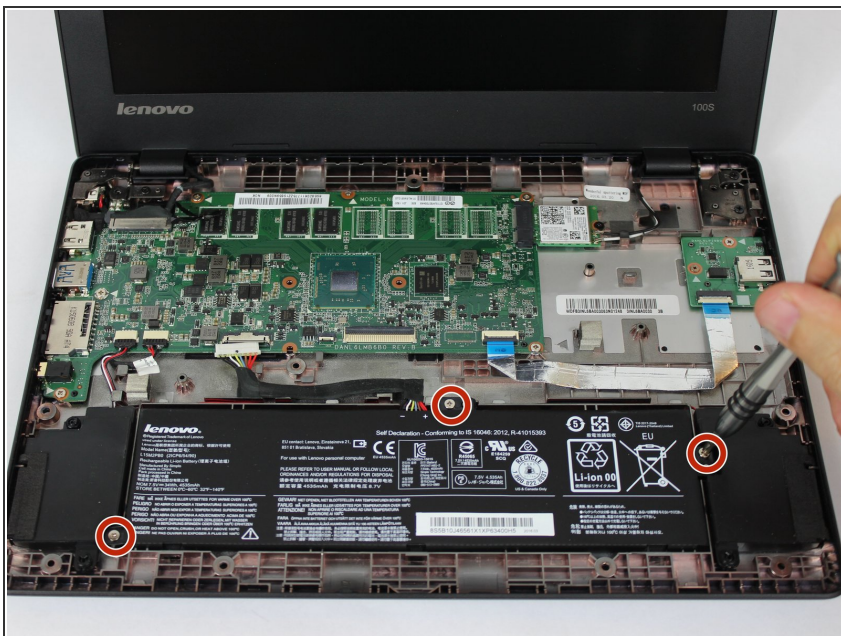

- Unlock the keyboard ZIF connector to release the keyboard flex cable.
 - ❗ To unlock a [ZIF connector](#), use an opening tool or your fingernail to flip up the small, hinged locking flap.
- Unlock the touchpad ZIF connector to release the touchpad flex cable.
- Carefully pull both flex cables out of the ZIF connectors.
- Remove the keyboard plate up and place it to the side.

Step 5

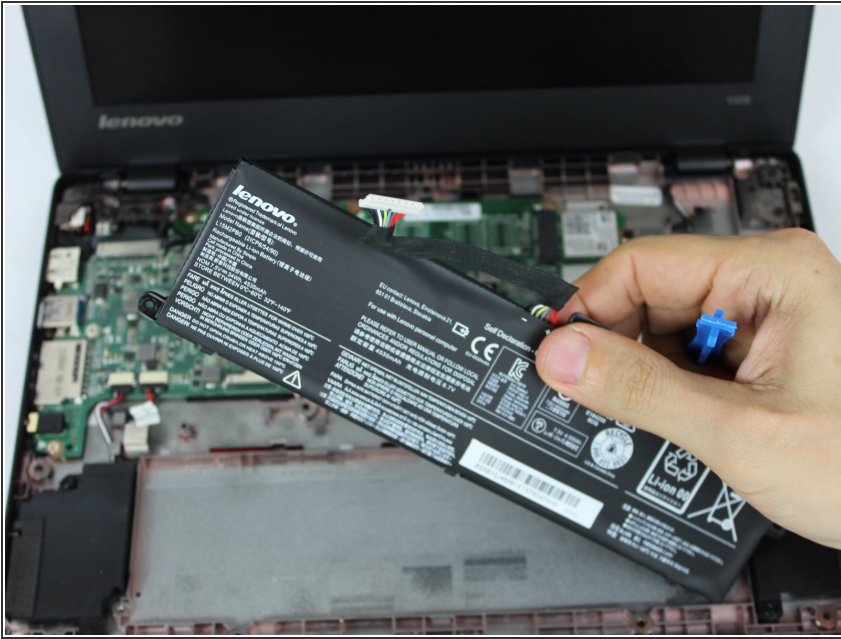

- Unplug the battery cable by pulling it towards the battery.
- ⚠ Pull parallel to the battery, not straight up.

Step 6

- Use the Phillips #0 screwdriver to remove the three 6mm screws from the battery.

Step 7

- Remove the battery.

To reassemble your device, follow these instructions in reverse order.

For optimal performance, after completing this guide, [calibrate](#) your newly installed battery.

Take your e-waste to an [R2 or e-Stewards certified recycler](#).

Repair didn't go as planned? Try some [basic troubleshooting](#), or ask our [Answers community](#) for help.
