Step 1 — Battery

⚠️ Make sure the laptop is off and unplugged (not charging).

● With the laptop closed and upside down, unscrew the nineteen 5.5mm Phillips #1 screws that keep the back cover in place.

Step 2

● Slide the optical drive out of the laptop.

Step 3

- Use a Phillips screwdriver to remove the three screws along the edge of the optical drive bay.
Step 4

- Using your fingers, gently loosen the edges of all four sides of the back cover.
- Gently pull off the back cover.

Step 5

- Unscrew the single 5.5mm Phillips #1 screw keeping the battery secure.
Step 6

- Grab the battery with your fingers and gently pull it up and away from the rest of the laptop.

Step 7 — Hard Drive

- Remove the two 5.5mm screws with the Phillips #1 screwdriver.

Step 8

- Gently pull out the hard drive by wiggling it from right to left with your hands until it is removed.

To reassemble your device, follow these instructions in reverse order.
