

# Nokia 8265 Display Screen/Keyboard Replacement

How to take out and replace the cell phone display of the Nokia 8265.

Written By: Jack

 **TOOLS:**

- [JIS Driver Set](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Replacement Display Keyboard](#) (1)
-

## Step 1 — Display Screen/Keyboard

- Start by removing the face plate of the phone with a plastic tool.
- Once plastic tool is wedged into the side of the phone, twist and leverage the face plate off.

## Step 2

- Once the face plate is off, you will have exposed the keypad.

### Step 3

- Simply remove the keypad from on top of the phone, and place it off to the side, leaving just the phone itself remaining

### Step 4

- Taking a very small screwdriver, carefully unscrew the six screws attaching the top layer of the screen from the body of the phone.
- Make sure to remember what screw goes where.

## Step 5

- Once the six screws are removed, you may take off the screen section of the phone, exposing the inner workings of the cell phone.

## Step 6

- Now you have successfully removed the display screen and keyboard.
