INTRODUCTION

If your screen is cracked or not working properly, this guide will show you how to replace the screen on the ASUS U57A-BBL4.

🔧 TOOLS:

- Metal Spudger (1)
- Phillips #00 Screwdriver (1)

This document was generated on 2020-11-26 09:27:13 AM (MST).

Step 1 — Display Assembly

- Carefully pry the two rubber covers at the bottom of the screen off with a metal sprudger.

Step 2

- Remove the two 1.84 mm Phillips head screws at the bottom of the screen using PH00 screw driver.
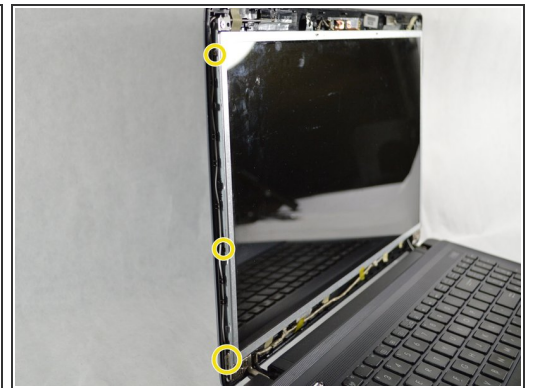

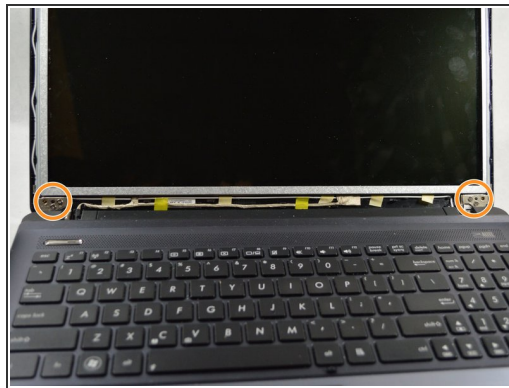

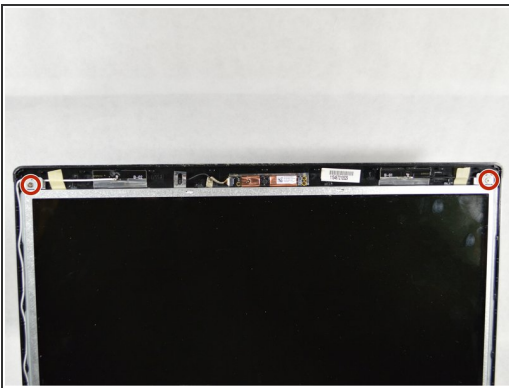

Step 3

- Starting from one of the corners, use your fingers to pry the bezel from the screen.

- ⓘ There is a popping sound when the bezel is loosened from the screen.

Step 4

- Remove the top two 2 mm Phillips head screws.

- Remove the four 2 mm Phillips head screws on the bottom.

- Remove the eight 2 mm Phillips head screws on the sides of the screen. There are four on each side.

- ⓘ There are 14 screws in total: two on the top, four on the bottom, and four on each side. Use PH00 screw-driver for removing all 14 screws.
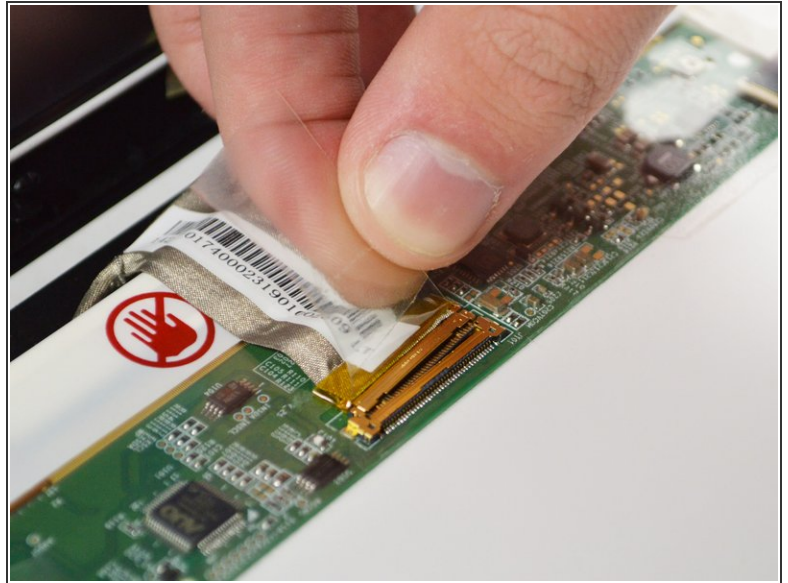

Step 5

⚠️ Don't tear off the bottom of the screen or you might damage the connector cable.

● Carefully lower the screen from the casing with your fingers, making sure to keep the bottom intact and lay it face down on the keyboard.

Step 6

- Disconnect the connector cable at the bottom by loosening the adhesive tape and lifting up.

- Gently slide the cable out of the ridges to free the screen from the casing.

To reassemble your device, follow these instructions in reverse order.
